REGULATORY COMPLIANCE

FCC Class B Information

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

CE Compliance for Europe

This equipment has been tested and found to comply with the limits for European Council Directive on the approximation of the law of the member states relating to electromagnetic compatibility (89/336/EEC) according to EN55022 Class B.

LIMITED WARRANTY

Swordfish Tech, LLC warrants that the product, in the course of its normal use, will be free from defects in material and workmanship for a period of one (1) year from the date of purchase. Swordfish Tech, shall have no liability for any product returned if it is determined that the product a) was not purchased from authorized retailers, b) that the asserted defect is not present or cannot reasonably be rectified because of damage occurring before Swordfish Tech receives the product, or c) is attributed to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing parts. The foregoing warranty shall extend to repaired or replaced products for the remaining of the applicable period of the original warranty or ninety (90) days from the date of shipment of a repaired or replaced product, whichever is longer.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
