Subject: Request for a Class II Permissive Change

FCC ID: 2AMSP-DT16
Grant Date(s): 08/30/2022

Pursuant to CFR47 §2.1043, the Grantee **Carl Zeiss AG** hereby requests a Class II Permissive Change for the above identified device.

Following changes apply to the modified device:
This modular approved transmitter module will be integrated by the Grantee himself into his own final end product (Thermal Imaging Monocular).

For this dedicated integration, the DSS portion (Bluetooth Basic Rate and Enhanced Data Rate) is deactivated via firmware and the output power of the DTS portion (802.11 WLAN) is reduced via power settings by the Grantee in the manufacturing process.

The end-user has no ability to re-active the disabled functions or change the power settings.

There are no further changes made to the original product. There are no changes made to the transmitter circuitry and the above listed changes result in the same RF characteristics as in the original filing - therefore the not repeated test results continue to be representative of and applicable also to this modified device.

Sincerely,

Sabrina Berghahn
