

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the exterior of a black, ergonomically shaped device housing. The housing is placed on a blue textured surface next to a black ruler with white markings. The ruler is oriented vertically on the left and horizontally at the bottom. The housing features a rectangular slot on the left side and a small red circular button on the right side. A small black component is visible to the right of the housing.
EUT Housing and Board View 2	 A photograph showing the interior of the device housing, revealing the internal components. The housing is split open, showing the green printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and a battery. The internal components are connected by wires. The housing is placed on a blue textured surface next to a black ruler with white markings. The ruler is oriented vertically on the left and horizontally at the bottom.

Solder Board-Component View 1	
	

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled '2', positioned on a blue textured surface. The component is irregularly shaped with several circular holes and solder points. It is placed next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled '3', positioned on a blue textured surface. The component is rectangular with a central square cutout and various electronic components, including a large integrated circuit (IC) and several surface-mount components. It is placed next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 4	 A photograph showing a small green printed circuit board (PCB) component with a black integrated circuit (IC) and several surface-mount components. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is oriented vertically, with its longer edge parallel to the ruler's 0-100 mm scale.
Antenna View	 A photograph showing the same green PCB component from a different angle, highlighting the antenna structure. A red rectangular box is drawn around the antenna area, and a red line points from the text "BT Antenna" to this box. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component is oriented horizontally, with its longer edge parallel to the ruler's 0-100 mm scale.
