

USER MANUAL

In order to bring you a better experience, please read this user manual carefully before using this product and keep it properly for future reference.

Specifications

EN

Product Name	Wireless Charging
Product Model	WX9-
Input	5.0V $\overline{\sim}$ 1.5A
Output	5W MAX
Charge Sensing Distance	$\approx$ 3mm
Working Temperature	0°C–35°C/32°F–95°F
Package Contents	Wireless Charging x1, User Manual x1

The parameters above are derived from the laboratory of TORRAS. The actual parameters would be different due to production processes and other factors. The image shown here is indicative only.

Overview

USB-C Connector

Apple Watch Wireless
Charging Area

Instructions

1. Before use, gently open the USB-C connector protective cover.

Note:

- ① Do not pull or twist the protective cover with force, as this may damage the product.
 - ② When not in use, close the protective cover downward to protect the USB-C connector.
-
2. Insert the USB-C connector into a power adapter or other power source with a USB-C output.
 3. Place the back of the Apple Watch onto the magnetic charging surface. The magnets will automatically align the watch, and charging will begin.

Precautions

1. Special Group Protection

- 1.1 Users with cardiac pacemakers or other implanted medical devices should not place the wireless charging product in the shirt pocket or use it close to the chest, as magnetic interference may cause device malfunction.

2. Compatibility Information

- 2.1 This product is designed exclusively for devices that support Apple Watch wireless charging. Using incompatible devices may result in charging failure or abnormal performance.
- 2.2 Please use a USB-C power adapter or power bank that meets the required specifications. Power sources that do not comply with these specifications may lead to reduced charging speed or improper operation.

3. Usage and Storage Recommendations

- 3.1 Do not place metal objects, magnetic cards, or electronic storage media (such as credit cards or access cards) near the wireless charging area, as this may interfere with charging performance or cause damage.
- 3.2 When charging, ensure that the device is properly aligned with the center of the wireless charging area. Misalignment may result in reduced charging efficiency or failure to charge.
- 3.3 For optimal performance and product longevity, use this product in a well-ventilated environment at normal ambient temperatures. Heating or reduced charging efficiency may occur in high-temperature environments; this is considered normal. Do not use or store the product

in damp, high-temperature, strong magnetic, or high-vibration environments.

3.4 Keep this product out of reach of children.

3.5 If abnormal heating, unusual odors, intermittent charging, or unresponsive devices are observed during use, stop using the product immediately and disconnect the power supply. Allow the product to cool down before attempting to use it again.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.
3. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

All products bearing this symbol are waste electrical and electronic equipment which should not be mixed with unsorted household waste. Instead, you should

protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. Please contact the installer or local authorities for more information about the location as well as terms and conditions of such collection points.
