Specification

DEVICE

Model	SEESUN B:CON-10
Size	
Weight	45g
Frame materials	TR90/ULTEM/SILICON
Lenses materials	TAC(Polarized), Blue light / 6Based
Bluetooth Ver	Bluetooth 4.1+EDR
Bluetooth Profile	A2DP 1.3,HFP 1.6,HSP 1.2,AVRCP 1.5
Trasmission range	Up to 33feet(10 meters)
Charger Type	Micro-USB
Charger Input	DC 5V min 0.5A
Battery	Li-polymer 3.7V 200mAh
Charge time	Approximately 2 hours
Talk time	Up to 10 hours
Play Time	Up to 7 hours
Standby time	Up to 120 hours
Operation Circumstances	Temperature / -10°C~50°C Humidity / 60 % ~ 70%
Country of origin	Korea

BCT SPEAKER

Type	Bone Conduction Transducer
Bone Conduction Transducer	16 Ohms ±15% at 1 Khzs
Frequency response	100 HZ ~ 12,000 HZ
Bone Conduction Sensitivity (1KHz)x 100mV rms	77 dB ± 3dB (dB re 1.0 dyne)

MIC

Type	Electrets Condenser Microphone
Output impedance	2.2 Kohms
Frequency response	20 Hz ~ 20 KHz
MIC sensitivity	42 dB±3dB at 1 KHz
Directivity	OMNI Directivity

Reset

If B:CON can't connect to a Bluetooth on a device, you can reset B:CON to its factory settings.
When power B:CON on, please press (+),(-) buttons together for over 3seconds.
And then the LED indicator flickers a red and a blue light with a vibration.

Additional information

Radio frequency exposure

This Bluetooth® Bone Conduction Headset, B:CON, is a radio transmitter and receiver. When in operation it communicates with a Bluetooth® equipped mobile device by receiving and transmitting radio frequency (RF) electromagnetic fields (microwaves) in the frequency range 2.4 to 2.4835 GHz. The output power of the radio transmitter is low (0.001 watts). Your Bluetooth® Headset is designed to operate in compliance with the RF exposure guidelines and limits set by national authorities and international - health agencies.

Limited warranty

Subject to the conditions of this Limited Warranty, SEESUN.CO.,LTD warrants this product to be free from defects in design, material and workmanship at the time of its original purchase by a consumer, and for a subsequent period of one (1) year. Should your product need warranty service, please return it to the dealer from whom it was purchased or contact a contact centre to get further information.

Precautions

Do not drop the device.
Do not modify, repair, or disassemble.
Do not expose directly to water, alcohol, benzene, etc. for cleaning.
Do not expose directly to flammables.
Do not place or keep the device near flammables.
Keep the device away from excessive humidity and dust.
Do not place heavy objects on the device.

- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- There is a risk of explosion if the battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.
- Do not change glasses lenses by yourselves. Lenses or frames can be broken by over pressure or inexperienced. Please visit near optical store to change lenses.
- Do not move BCT head with excessive force above the range of moving. It may cause damaged or broken.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Bone conduction is the conduction of sound to the inner ear through the bones of the skull. Bone conduction transmission can be used with individuals with normal or impaired hearing.
Bone conduction is one reason why a person's voice sounds different to them when it is recorded and played back. Because the skull conducts lower frequencies better than air, people perceive their own voices to be lower and fuller than others do, and a recording of one's own voice frequently sounds higher than one expects it to sound.
Musicians may use bone conduction while tuning stringed instruments to a tuning fork. After the fork starts vibrating, placing it in the mouth with the stem between the back teeth ensures that one continues to hear the note via bone conduction, and both hands are free to do the tuning.

How to wear

Just wear the glasses as general glasses. To find good sounds and location for each individual, please pull down BCT head to the front of ear before wearing glasses.
If trying to move BCT head as wearing, it can make uncomfortable.

FCC RF Exposure Information

This quipment complies with FCC RF exposure limit requirements set for in an uncontrolled environment
