

Diagram of the Power Bank with labels:

- Wireless charging
- Power On/Off Button
- USB output
- Micro USB input
- Capacity Indicator

Power On/Off Button: press once to check LED indicators; Press the button for 1.5 seconds to turn off.

Number of LEDs	 Blue	 Blue	 Blue	 Blue
Capacity Remaining	about 100%	about 75%	about 50%	about 25%

MADE IN CHINA

1. Charging the portable Power bank
 - a. Using your mobile phone's USB adapter. Connect a USB cable to your phone's USB adapter. Using the micro USB connector, connect the other end of the USB cable to the IN port on the portable Power bank. Plug the USB adapter into the outlet to begin charging.
 - b. Using your computer. Connect a USB cable to a USB outlet on your computer. Using the micro USB connector, connect the other end of the USB cable to an IN port on the portable Power bank. Make sure the computer is on to begin charging the portable Power bank.
2. Charging mobile phones and other electronic devices with USB output.
 - a. The portable power device has a USB output port which has the maximum output current of 2100 mA.
 - b. Connect to USB cable to your mobile phone/device using the appropriate connector. Connect the other end of the USB cable to the OUT port of the portable Power bank. Your mobile phone/device should display the status of charging.
 - c. Remove the USB cable from your mobile device when it is fully charged.
3. Charging mobile phones and other electronic devices with wireless output.

To use the wireless charging mode the mobile device needs to be a Qi-enabled device. If necessary, enable wireless charging in the settings of your mobile device. Next simply stick your device to the suction pad and the wireless charging will start.

Note: In order to charge device use only accessory cable (provided with power bank) or the cable included with your own device by the manufacturer.

- WARNING – When using this product, basic precautions should always be followed, including the following:
1. Read all the instructions before using the product.
2. Power bank unit contains an internal lithium ion battery. Upon initial use or after a prolonged storage period, fully charge it once. The unit's full performance is achieved only after 2 or 3 completed charge and discharge cycles.
3. Power banks are not allowed in checked luggage on commercial airline flights. Handle with care and dispose of in accordance to local regulations. Carry-on only.
4. To reduce the risk of injury, close supervision is necessary - when the product is used near children.
5. Do not put fingers or hands into the product.
6. Do not expose power bank to rain or snow.
7. Use of a power supply or charger not recommended or sold by power pack manufacturer may result in a risk of fire or injury to persons.
8. Do not use the power bank in excess of its output rating. Overload outputs above rating may result in a risk of fire or injury to persons.
9. Do not use the power bank that is damaged or modified. Damaged or modified batteries may exhibit unpredictable behavior resulting in fire, explosion or risk of injury.
10. Do not disassemble the power bank. Take it to a qualified service person when service or repair is required. Incorrect reassembly may result in a risk of fire or injury to persons.
11. Do not expose a power pack to fire or excessive temperature. Exposure to fire or temperature above 100°C may cause explosion. The temperature of 100°C can be replaced by the temperature of 212°F.
12. Have servicing performed by a qualified repair person using only identical replacement parts. This will ensure that the safety of the product is maintained.
13. Do not charge the power bank while using the power bank to charge a device. Do not charge the power bank for more than 4-6 hours and do not leave unattended.
14. Disconnect off the power bank when not in use.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 10cm between the radiator & your body.
