

[illegible]

1. Please read the user manual and the **SAFETY INFORMATION** carefully.
2. Do not use the battery pack with a damaged or deformed case.
3. Do not use the battery pack with a case that has been exposed to fire or high temperature.
4. Do not use the battery pack with a case that has been exposed to moisture or liquid.
5. Do not use the battery pack with a case that has been exposed to strong magnetic fields.
6. Do not use the battery pack with a case that has been exposed to strong electric fields.
7. Do not use the battery pack with a case that has been exposed to strong vibration or shock.

Aerogel battery charge

1. Please read the user manual and the **SAFETY INFORMATION** carefully.
2. Do not use the battery pack with a damaged or deformed case.
3. Do not use the battery pack with a case that has been exposed to fire or high temperature.
4. Do not use the battery pack with a case that has been exposed to moisture or liquid.
5. Do not use the battery pack with a case that has been exposed to strong magnetic fields.
6. Do not use the battery pack with a case that has been exposed to strong electric fields.
7. Do not use the battery pack with a case that has been exposed to strong vibration or shock.

THE RELATED NOTES ABOUT LITHIUM BATTERY'S USAGE

1. Please read the user manual and the **SAFETY INFORMATION** carefully.
2. Do not use the battery pack with a damaged or deformed case.
3. Do not use the battery pack with a case that has been exposed to fire or high temperature.
4. Do not use the battery pack with a case that has been exposed to moisture or liquid.
5. Do not use the battery pack with a case that has been exposed to strong magnetic fields.
6. Do not use the battery pack with a case that has been exposed to strong electric fields.
7. Do not use the battery pack with a case that has been exposed to strong vibration or shock.

Use of storage

1. Please read the user manual and the **SAFETY INFORMATION** carefully.
2. Do not use the battery pack with a damaged or deformed case.
3. Do not use the battery pack with a case that has been exposed to fire or high temperature.
4. Do not use the battery pack with a case that has been exposed to moisture or liquid.
5. Do not use the battery pack with a case that has been exposed to strong magnetic fields.
6. Do not use the battery pack with a case that has been exposed to strong electric fields.
7. Do not use the battery pack with a case that has been exposed to strong vibration or shock.

THROWING		
Throwing involves a sequence of movements by which an object is thrown forward by hand about 2 metres distance. It is a skill that is used in many sports (see diagram).		
 		
PROBLEMS AND SOLUTIONS		
PROBLEMS	CAUSES	SOLUTIONS
Transfer and working	1. The transfer motion is not right	1. Train the thrower
	2. The transfer motion is incorrect	2. Practice the transfer motion
	3. The transfer motion is not coordinated	3. Practice the transfer motion
	4. The transfer motion is not right	4. Practice the transfer motion
Control	1. The transfer motion is not coordinated	1. The transfer motion is not coordinated
	2. The transfer motion is not right	2. Practice the transfer motion
Accuracy	1. The transfer motion is not coordinated	1. The transfer motion is not coordinated
	2. The transfer motion is not right	2. Practice the transfer motion
Endurance	1. The transfer motion is not coordinated	1. The transfer motion is not coordinated
	2. The transfer motion is not right	2. Practice the transfer motion
PRECAUTIONS 1. The transfer motion is not coordinated	1. The transfer motion is not coordinated	
2. The transfer motion is not right	2. Practice the transfer motion	
3. The transfer motion is not coordinated	3. Practice the transfer motion	
4. The transfer motion is not right	4. Practice the transfer motion	
5. The transfer motion is not coordinated	5. Practice the transfer motion	
6. The transfer motion is not right	6. Practice the transfer motion	
7. The transfer motion is not coordinated	7. Practice the transfer motion	
8. The transfer motion is not right	8. Practice the transfer motion	
9. The transfer motion is not coordinated	9. Practice the transfer motion	
10. The transfer motion is not right	10. Practice the transfer motion
