

User Manual

WiFi Projector

Model: D40S

Pls read this manual carefully before using this product, and properly keep for future reference.

Thanks for your choosing!

1. With this portable home theater projector, you can enjoy movies, videos, games, sports, pictures and more. As if you were watching a 150" dynamic image.
2. You can mirror your iPhone/ Android smart Phone to the projector, by WiFi or data cable.
3. The lifetime of LED light sources is up to 30000 hours.
4. LED projector is best for home video entertainment, it's better for you to enjoy videos in dark environment.

Not recommend the projector for word or excel. This is not suitable for using in the education domain, and the video playback is the main function.

Standard accessories

Some of the accessories may vary by region.

Projector view

Operation

1.Starting up the projector

1. plug power cable into outlet . The POWER indicator light on the projector lights blue after power has been applied. Setting > Display>Projection> front projection

Please use the supplied power cable to avoid possible dangers such as electric shock and fire.

2. Press on the projector or on the remote control to start the projector, press 3 second as soon as the lamp lights up. The POWER indicator light flashes and stays blue when the projector is on. The fans start operating, and a start-up image is displayed on the screen while it warms up. The projector does not respond to further commands while it is warming up.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The distance between user and products should be no less than 20cm
