1 2

After completing BT and 2.4G connection, short press the mode switch button on the bottom of the mouse to easily switch between devices.

The diagram shows the bottom of the mouse with two circular buttons. The left button is labeled 'BT Mode' and has a light blue icon of a mouse. The right button is labeled '2.4G Mode' and has a light red icon of a mouse. A central circular button is labeled 'Mode Switch' and has a light green icon of a mouse.

BT Mode
The light shows white.

2.4G Mode
The light shows white.

The diagram shows the bottom of the mouse with a central circular button labeled 'RGB Light ON/OFF'. To the left of this button is a small rectangular button labeled 'Light On/Off'. Below the central button is a small rectangular button labeled 'Light On/Off'.

RGB light ON/OFF button :
Long press for 3 seconds to turn on the breathing light, long press again for 3 seconds to turn off the light.

RGB Light Bar:

The diagram shows the bottom of the mouse with a central circular button labeled 'RGB Light ON/OFF'. Below this button is a long, thin rectangular bar labeled 'RGB Light Bar'.

1 Use the included TYPE C cable to charge the mouse when the battery is low.

The diagram illustrates the charging process. At the top, a battery icon with a lightning bolt is connected to a USB-A port. A Type-C cable is shown connecting the USB-A port to the mouse. The mouse is shown with a red light on its bottom, indicating it is charging. The text 'USB-A' is written next to the port. The mouse is shown from a top-down perspective, with the red light located on the bottom left side.

2 The light on the left side of the bottom flashes red when low voltage, the light turns red while charging and will be off after fully charged.

How long can the mouse work after fully charged
 When the RGB is always turned on, the mouse can work for 4-15 days based on the frequency of daily use.
 If the RGB is not activated during use, the mouse can be used for 1-2 months on a full charge.

- 1) **For 2.4G Mode:** Repower the mouse. Press and hold the middle scroll button and the left and right click buttons simultaneously for 5 seconds until the 2.4G indicator light flashes. (put the mouse close to the port of the device), and then release your hand and insert the USB receiver.
- 2) **For Bluetooth Mode:** Repower the mouse. Press and hold the middle scroll button and the right-click button simultaneously, while turning on the mouse. The BT indicator light will flash quickly. Connect the mouse to your device via Bluetooth.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If interference is determined to be caused by this radio or television receiver, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
