FCC ID: 2ANCG-CS61006

- **784748 D01 Labelling Part 15 &18 Guidelines v08**

Generally, an area for labeling smaller than the palm of the hand is considered too small for the compliance statement.

If the device is subject to Certification: (1) Section 2.925 contains information on identification of the equipment; (2) include a label bearing an FCC Identifier (FCC ID) (Section 2.926) and (3) include the appropriate compliance statement in Section 15.19(a). If the labelling area is considered too small and therefore it is impractical (smaller than the palm of the hand) to display the compliance statement, then the statement may be placed in the user manual or product packaging. However, the device must still be labelled with the FCC ID. If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small – the label area allocated to the FCC ID may not be reduced because of over crowded identification of other product and regulatory information. Justification for placing the FCC ID in the manual must be submitted with the initial application for certification for review and approval.

For Section 15.212 modular transmitters and software defined radios (Section 2.944) using an electronic display the FCC ID must be readily accessible.

As an option to placing the FCC label on the exterior of the device, the FCC label may be placed in a user accessible area if the following conditions are met:

- The device is **handheld** (notebook computers are considered as handheld);
- The **FCC identifier is visible** at the time of purchase. **Marketing the device without the battery installed** when the label is in the battery compartment is acceptable. The FCC ID on the box, or additional documentation directing the user where to find the FCC label, also satisfies this requirement;
- The user accessible area must not require any special tools for access, and the FCC label must not be placed on a removable part;
- The FCC ID, Model Number, or FCC logo must be on the label and must meet all general labelling requirements or policies that apply for Certification, Verification or DoC.
