

MDWBRCU2D USB Interface Description Letter

1, Structural photos

2, Scenes to be used

MDWBRCU2D is a Wi-Fi and Bluetooth Low Energy (LE) combo adapter board developed by Tuya Smart. It is designed to be used in traditional home appliances such as air conditioners and dehumidifiers, making Host intelligent. The computer is not among its uses.

3, Interface Description

The external communication interface on the hardware of the module is a TTL level serial port, and the usb port of the computer is USB protocol, so there is no communication on the hardware. At the same time, the process of starting the networking of the module must be initiated through the serial port command, so when the module connected to a computer, although it plugs in, it won't work.
