DISPLAY INSTRUCTION

PRODUCT STRUCTURE

1.Product Layout

① Unit Switching
② LED Display
③ Power on/ Tare/ Clear to Zero/ Power off
④ Battery Cover

2.LED Display

OPERATION INSTRUCTION

1. Please install the battery according to the indicated direction before use.
2. Please place the scale on a hard and level surface.
3. Power on: Press the (ON/TARE) button. It will start working with "0g" displayed.
4. Unit switching: Press the (UNIT) button to switch among g, ml(water), fl.oz., lb:oz, ml(milk) units.
When only the "ml" indicator light is on, it means that the device is in the function of weighing water volume; when "ml" and the milk mark lights up at the same time, it means that the device is in the function of weighing milk volume.
5.Tare: Weigh Object A first, press (ON/TARE) once, wait for tare finishing and back to zero. When the "TARE" light is on and the value is zero, place object B in the center of the scale, object B weight is displayed.
6. Continuous taring: You can use the tare function repeatedly by pressing the (ON/TARE) button continuously. Press the (ON/TARE) button once before all objects on the scale are removed, and the weight of all objects will be displayed on the LED screen.
7. Clear to zero: After the measurement is completed, remove all objects on the scale. Press the (ON/TARE) button to clear to zero if the value displayed is not zero.
8. Auto power off (Power Saving Mode): If there is no operation or weight changed on scale within 30 seconds, it will enter into Power Saving Mode; and it will automatically shut down if there is still no operation within 90 seconds.
9. Manual power off: To extend battery life, please press the (ON/TARE) button over 3 seconds to shut down the scale.

Operation 2:

① Click "diary" to add food.
② Choose food to record.
③ Turn on your phone's Bluetooth and place the food on the scale.
④ Click "Add", record completed.

FAQs

Question 1:
Cannot boot for first time use or the LED screen has no display?
Answer:
Firstly, please check if the battery power is enough, then check if the battery is installed correctly. Now if everything is right, please keep your hands dry and touch the power button for 1 second to turn it on. If scale can't be booted normally after repeated these steps many times, please kindly contact the after-sales service for support.

Question 2:
Why my phone cannot connect with the smart kitchen scale?
Answers:

- Please kindly confirm your smart kitchen scale is turned on, and please keep your scale and electronic device in an effective pairing distance.
- Check if the battery power of your scale is sufficient, otherwise please replace the battery.
- Exit the APP and login again.
- Turn off the power of your smart kitchen scale, then reboot and rebuild the Bluetooth connection.
- Please confirm if the current Bluetooth version of your smart phone is 4.0 or above.
- If you use Android mobile phone, please open "Location" of your phone before you connect it to the scale.

ATTENTION

In order to prevent any property and body damage during use and to maintain long-term capability of the product. Please observe these followings while using this product.
1. Please put the device on a clean, hard and level surface.
2. To ensure the accuracy of this device, please do not to use the scale in an environment that is too wet, cold or hot.
3. This is a high-precision electronic weighing device, please handle it gently and do not drop or hit it, otherwise the device will be easily damaged.
4. This device is a household product and should not be for commercial use.
5. Please do not weigh corrosive objects directly.
6. If the scale hasn't been used for a long time, please take out the battery to avoid battery leakage, heating or cracking etc. which brings damage to the product.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.
