FCC ID: 2ANFF-Q105

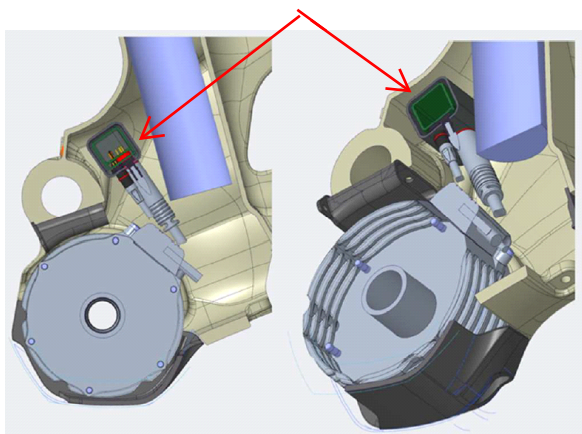

Request for exemption of putting FCC ID on product label

We, CSA Group Bayern GmbH, request as authorized agent for TQ-Systems GmbH with Company ID: 2ANFF, to put the label of the device with FCC ID: 2ANFF-Q105 in the user manual and packaging.

The device has a form factor of about 50 mm x 22 mm x 21 mm.

The device is factory-installed or installed by authorized dealers inside the e-bike near the motor, and it is never visible to the end user during normal operation. Only in rare service cases a limited number of standalone gateways are imported, and for these units where the FCC ID appear on the packaging and in the user manual.

Here is a drawing showing the installation location within the bicycle frame for the motor:
