MEDIDOR GROUP LLC ACCEPTS NO RESPONSIBILITY FOR INJURY TO CONSUMER IF PRODUCT IS NOT HANDLED BY RESPONSIBLE ADULTS.

Please visit our website at www.medidor.com and go to our installation tab to see to see our video on all instructions.

- 1). Open your box and remove your Medidor1 from its packaging. Place your Medidor on a flat surface to begin the installation process.
- 2). Please read the Securam Lock Manual thoroughly. To begin locate the battery compartment on the bottom right side of the lock, to open the battery compartment slide the black latch down until battery compartment opens. Now you need to locate your 9V alkaline battery in your packaging and insert it in the battery holder and reinstall the battery compartment to the lock and click the latch back into its original position. Now that your lock is active you can open your Medidor by entering the factory default code of 1-2-3-4-5-6 and waiting a second till you hear the lock bolts disengage. Then turn the square handle below the lock clockwise and gently pull the door open.

3). Upon deciding the placement of your Medidor1 you will need a stud finder to help in locating the desired location to mount the unit.

4). Now you are ready to mount your Medidor1 in your desired position. Drill the screws into the studs on the inside of the safe through the vertical holes that are provided.

Now you are ready to enjoy your new Medidor1 safe.

FCC Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the

instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
