

Six-key remote control operation manual

The latest upgraded LED dual-color remote control adopts a standard 2.4G data package to realize the adjustment of brightness and color temperature.

Specifications:

- Shell material: ABS material
- Remote control battery: AAA dry battery
- Working frequency band: 2.4~2.4835Ghz
- RF frequency: 5-8dbm
- Standby power consumption: 8 uA
- Product size: 115 × 38 × 12mm
- Net weight of remote control: 20g
- Point-to-point communication distance: more than 20 meters in an open place

Remote control function:

- ①Single point: increase the brightness by one level, long press: increase the brightness infinitely
- ②Single point: reduce the brightness by one level, long press: reduce the brightness infinitely
- ③Single point: increase the color temperature by one level, long press: increase the color temperature infinitely
- ④Single point: reduce the color temperature by one level, long press: reduce the color temperature infinitely
- ⑤Single point: turn on the lamp button, after the lamp is powered on, quickly and long press for code matching
- ⑥Single point: turn off the button, after the lamp is powered on, quickly press and hold to clear the code

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
