

Declaration Differences

The remote control produced by our company, model JCHR35H8, has different appearances of the casing and the panel, so the suffix ABCC is added to distinguish them. No matter what the appearance are, they have the the same circuit board, PCB layout, and electrical structure. The only differences lie in the appearance of the casing and the panel.

JCHR35H8-ABCC

('A' in model name means keyboard number. it can be 0, 1, 2; 0=10keys, 1=15 keys, 2=18 keys);

('B' in model name means overall appearance. It can be 7, 8, 9; 7=square, 8=oval, 9= square + round);

('CC' in model name means appearance panel. It can be 01-99; The number of representations gradually increases depending on the different appearance panels).
