Features

	Lit	Bluetooth on
	Unlit	Bluetooth off
	Blue and lit	Fan on
	Unlit	Fan off
	Red and flashing	Brightness exceeds 20% when fan is off
	Blue	Screen locked
	Unlit	Screen activated
	Red and flashing	New firmware revision ready to be upgraded

Installation

1.Installation of fresnel lens and barndoor

1.1 Insert the Fresnel lens and fasten it according to the arrow direction as shown in the figure.

* The interfaces of the product are non standard, You can purchase "Bowens Mount Adapter" to adapt the products to accessories of other brands.

1.2 Align the mounts of the barndoor with the edge of the lens and then fasten it.

* The honeycomb plate, filter disc, and dome diffuser are equipped with magnets, and hence can be mounted together with the barndoor.

2.Installation of the handle

Align the handle with the mounts at the bottom of the light body and then fasten it.

3.Adjustment of light body angle

Loosen the butterfly knob on the handle by turning counterclockwise, then adjust the light to the desired angle, and then tighten the knob clockwise.

4. Installation of power supply

Adjust the V-mount clamp to the desired appropriate height and then fix it on the tripod (by turning the knob clockwise), and then insert the power supply into the V-mount port.

Power Supply

1.AC power supply

2.DC power supply

Operation

1. Press and hold the power button for 1.5s to turn on / off the light

2. Brightness adjustment

- 2.1 Rotate the brightness adjustment knob, range is 1% - 100% (85lm - 8,500 lm). Press and hold the brightness adjustment knob to toggle between brightness unit of measure of INT (%) and LM.

Color temperature adjustment

- 2.2 Rotate the color temperature adjustment knob to adjust the color temperature, range is 2,700 K - 6,500 K.

Lighting effects

2.3 Press "⚡" to enter lighting effects menu and activate different lighting effects.

Screen lock / dim

2.4 Short press the screen lock button to turn off the screen, press any button to turn on the screen. Press and hold the screen lock button to disable all buttons to prevent unintentional operation, press and hold the screen lock button to disable the screen lock.

3.NFC connection

Place the NFC sensing area of the mobile device against the area with "NFC" mark on the light body, this will immediately launch the Hobolite App.

* Note that the Hobolite APP must already be installed in the device and NFC function in the device is activated.

4. Bluetooth pairing & reset

Select the bluetooth - pairing & reset option in the setting page to reset the bluetooth of the light and activate the pairing state for 60s. If pairing fails, repeat the operation.

5. Firmware update

When a firmware is ready to be upgraded, a red "🔄" will appear at the upper right corner of the screen.

You can upgrade the product's firmware via the Hobolite App.

* Note the product will only prompt the existence of an updated version if device APP has paired with the product and used regularly".

App Download

You can download the Hobolite app in the (Apple) App Store and Google Play store by scanning the following QR code. Please visit the official website (www.hobolite.com) for more detailed instructions.

Warranty Terms

We provide a one-year warranty period for the original buyer of the product.
For the detailed warranty scope, please log in our website www.hobolite.com.

Important notes:

- Please retain your original purchase invoice and warranty card and ensure that the complete supplier information is on the invoice, including the purchase date and product serial number, which will be needed when making a claim against the warranty.

The warranty does not cover:

- Damage caused by improper use, false wiring, incompatible, poor quality or misadjusted external devices (excluding damage caused by exposure to rain);
- Damage to the appearance of the product caused within 30 days after the purchase date of purchase or caused by improper surface contact;
- Damage caused by dealers during transportation.

The warranty will be invalid if:

- The product serial number has been torn off or can't be identified;
- The product has been repaired or modified by oneself, and not by our company nor by designated repair personnel.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
