

Wireless charge User Manual

C1002

Plug in your charger to a powered USB port,
The LEDs should light up white. Place the
Wristband in the slot . The
white lights on the charger will turn orange
next to the device when charging properly.
theLED will blink or remain white if not
charging properly or if the device is not placed
properly.

Your devices requires about 100 minutes to fully
charge their lithium-polymer batteries. Once
fully charged, the LEDs on the charger will
change back to white. It is recommended to
fully charge your device as you finish the rest
of the setup process. With normal use, your
Wristband should last about four days on a
single charge, depending on use.

two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
