charging your device

- Using the included charging cable, connect the USB-C end into the keyboard and plug the USB-A end into a computer or power supply of DC 5V/1A.
- **WARNING:** Please use UL compliant power supply.
- The charging indicator will be red when charging and the LED indicator will turn off when fully charged.
- Full charge takes approximately 4.5 hours and can provide up to 90 hours of use when fully charged.

connection method

2.4GHz wireless connection mode:

- Flip the power switch to the ON position.
 - Plug the receiver into your device.
 - Press "FN+ Q" to switch 2.4G mode, the background indicator will flash white.
 - The keyboard and receiver will automatically connect. The background indicator will fade when connecting is successful.
- Tip:** To use the media keys hold FN and press the secondary function (play/pause, volume up/down, etc.) you'd like to use.

Bluetooth connection mode:

pair with device 1 (channel 1)

- Flip the power switch to the ON position.
- Press "FN + E" to enter BT 1 pairing mode. White background light flashes when active
- Use the Bluetooth settings on your device to pair with "KPOP x Heyday KB ". The background indicator will fade when pairing is successful.

pair with device 2 (channel 2)

- Flip the power switch to the ON position.
- Press "FN + R" to enter BT 2 pairing mode. White background light flashes when active
- Use the Bluetooth settings on your device to pair with "KPOP x Heyday KB ". The background indicator will fade when pairing is successful.

pair with device 3 (channel 3)

- Flip the power switch to the ON position.
- Press "FN + T" to enter BT 3 pairing mode. White background light flashes when active
- Use the Bluetooth settings on your device to pair with "KPOP x Heyday KB ". The background indicator will fade when pairing is successful.

switching devices

- Press "FN + BT 1/BT 2/BT 3" to switch among the three paired devices. Press "FN + Q" to switch to 2.4GHz mode.
- **Note:** The keyboard will automatically pair the same way the next time it is powered on. The keyboard will automatically enter sleep mode after 30 minutes of inactivity.

Tip: Hold 3 seconds to enter Bluetooth pairing mode for new device, this disconnects the prior device and re-pairs the new one.

wired connection mode:

- Using the included cable, plug the USB-C end into the keyboard and the USB-A end into your computer and it will auto-connect

troubleshooting

- If the keyboard is not connecting, make sure the receiver is properly plugged into the computer or make sure wireless pairing is enabled on your device and pairing is successful.
- If the keyboard is not responding, check if the battery is low. If it is, please charge the keyboard.
- If you're still having connectivity issues, move closer to the device or reduce interference from other wireless devices by moving them away from the keyboard.
- Having trouble with your device? Be sure you're running the latest software on your devices. You can do this by doing a software update in the settings of your device.

Keyboard Model: BGK06 FCC ID: 2A023-BGK06, Receiver Model: BEM501R FCC ID: 2A023-BEM501R Working distance: 8-10m

Input 5V=800mA Made in China

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) This device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.
