WMK28

**UHF Professional 2-Channels Rechargeable Wireless Microphone System**

**User manual**

**1. Product Introduction**

The Rechargeable Wireless Microphone System uses UHF Frequency band transmission, which has the characteristic of long transmission distance, strong interference ability for delay, and clear sound quality. It is easy to use.

**2. Product description**

**2.1. Physical and external appearance**

Keep this manual for subsequent use.

**2.2. Product description**

**2.2.1. Microphone**

The microphone is a handheld microphone with a display screen and buttons. It is used for transmitting audio signals to the receiver.

**2.2.2. Receiver**

The receiver is a handheld device with a display screen and buttons. It is used for receiving audio signals from the microphone.

**2.2.3. Charging dock**

The charging dock is a device used for charging the microphone and receiver. It has a charging port and a power switch.

**2.2.4. Accessory**

The accessory includes a carrying case, a user manual, and a warranty card.

**2.2.5. Specifications**

The microphone and receiver have the following specifications:

- Frequency: 470-480 MHz
- Power: 5W
- Range: 1000m
- Channels: 2
- Display: LCD
- Buttons: 4
- Charging: USB
- Lighting: LED
- Temperature: -20°C to 60°C
- Humidity: 10% to 90%
- Air Quality: PM2.5, PM10, CO2

**3.1 Bluetooth connection**

Bluetooth audio receiver supports for Bluetooth new "Stereo" of this product in the Bluetooth device list and connect the "Stereo" in Bluetooth is stereo audio. If the Bluetooth connection is successful, there will be a prompt, and the Bluetooth logo will display on the front and top of the package.

**3.2 Output connection**

Audio amplifier (driver) with XLR-E interface, 0.55mm and 3.5mm audio input interfaces can be connected to this product, including headset, headphones, Bluetooth speakers, general speakers, and power speakers.

**4. FAQ**

| No. | Problems                 | Solutions                                                                                                                                                                                                                                                                                                                               |

| Notes             | 100mm*50mm*20mm | Notes: 100mm*50mm*20mm       |

**6. Packing List**

| Product Name                  | Quantity |
|-------------------------------|----------|
| Bluetooth Audio Receiver      | 1        |
| Bluetooth Audio Transmitter   | 1        |
| Bluetooth Audio Cable         | 1        |
| Bluetooth Audio Adapter       | 1        |
| Bluetooth Audio Charger       | 1        |
| Bluetooth Audio Case          | 1        |
| Bluetooth Audio Manual        | 1        |
| Bluetooth Audio Warranty Card | 1        |

# FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
