

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device, specifically the housing and board. The components are laid out on a blue textured surface next to a black ruler with white markings. The ruler is oriented vertically, with the 0 mark at the top. The housing is a light gray plastic shell, and the board is a dark gray printed circuit board (PCB) with various electronic components, including a battery, a small display, and several connectors. The components are arranged in a way that shows their relative positions and connections.
EUT Housing and Board View 2	 A photograph showing the internal components of a device, specifically the housing and board, from a different perspective than View 1. The components are laid out on a blue textured surface next to a black ruler with white markings. The ruler is oriented vertically, with the 0 mark at the top. The housing is a light gray plastic shell, and the board is a dark gray printed circuit board (PCB) with various electronic components, including a battery, a small display, and several connectors. The components are arranged in a way that shows their relative positions and connections. A small black component, possibly a USB connector, is visible on the right side of the board.

EUT Housing and Board View 3	
Solder Board-Component View 1	

Solder Board-Component View 2	 A photograph of a small, irregularly shaped black printed circuit board (PCB) component. The board is populated with various electronic components, including several surface-mount components, a larger central component, and a small antenna structure on the right side. The board is placed on a blue background with a white grid pattern. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the board, showing measurements in millimeters (0 to 80 mm) and centimeters (0 to 8 cm).
Antenna View	 A photograph of the same PCB component from a different perspective, focusing on the antenna structure. A red rectangular box highlights the antenna area, and a red line points from the text "BT Antenna" to this box. The board is placed on a blue background with a white grid pattern. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the board, showing measurements in millimeters (0 to 80 mm) and centimeters (0 to 8 cm).
