

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. A blue printed circuit board (PCB) is visible, featuring a central integrated circuit (IC) and various surface components. The PCB is positioned next to a black plastic housing component. A white ruler with black markings is placed horizontally below the components, showing measurements in millimeters (mm). The ruler has markings from 0 to 100 mm, with major markings every 10 mm and minor markings every 1 mm. The background is a light blue textured surface.
Solder Board-Component View 1	 A close-up photograph of a soldered component on a blue PCB. The component is a small, rectangular integrated circuit (IC) with gold-colored pins. The PCB is positioned next to a black plastic housing component. A white ruler with black markings is placed horizontally below the components, showing measurements in millimeters (mm). The ruler has markings from 0 to 100 mm, with major markings every 10 mm and minor markings every 1 mm. The background is a light blue textured surface.

Solder Board-Component View 2	 A photograph showing a small electronic component, labeled 'MD-V2 DONGLE V1.3', mounted on a blue printed circuit board (PCB). The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component located between the 10 mm and 20 mm marks. The background is a blue textured surface.
Antenna View	BT Antenna  A photograph showing the same electronic component from a different angle, highlighting the antenna area. A red box labeled 'BT Antenna' is drawn around the antenna section of the component. A red line points from the text 'BT Antenna' to the antenna section. The component is still next to the black ruler, and the background is the same blue textured surface.
