

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Unit Test) housing. The housing is white and cylindrical, with two circular openings. Inside, a green printed circuit board (PCB) is visible, connected to a white cable. A black ruler is placed horizontally below the housing for scale, showing measurements in millimeters. The background is a blue textured surface.
Solder Board-Component View 1	 A close-up photograph of a green printed circuit board (PCB) component. The board is populated with various electronic components, including a red component and a black component. A black ruler is placed vertically to the left of the board for scale, showing measurements in millimeters. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph showing a green printed circuit board (PCB) component with a red rectangular component soldered to its top surface. The component is placed on a blue textured surface next to a black L-shaped ruler with white millimeter markings. The ruler indicates the component is approximately 60 mm long and 15 mm wide.
Solder Board-Component View 3	 A photograph showing the underside of the same green PCB component. It features various electronic components including a large black integrated circuit (IC), several smaller surface-mount components, and a red rectangular component soldered to the top. The component is placed on a blue textured surface next to a black L-shaped ruler with white millimeter markings. The ruler indicates the component is approximately 60 mm long and 15 mm wide.

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled '94V-0 L-2 E312490 2222', with a red component attached. The component is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 10 to 70 mm vertically and 20 to 100 mm horizontally.
Solder Board-Component View 5	 A photograph of a small green printed circuit board (PCB) component, similar to the one in View 4, placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 10 to 90 mm vertically and 20 to 100 mm horizontally.

Solder Board-Component View 6	 A photograph showing a small green printed circuit board (PCB) component with a gold-plated connector. The component is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler has markings in millimeters (0-100 mm) and centimeters (0-10 cm). The PCB has some text printed on it, including "WAL 94V-0", "L-2 E312490", "2222", "WTH22X10209727W", "TV", and "2022-05-15".
Antenna View	 A photograph showing two circular antenna coils mounted on a white plastic frame, likely for a pair of glasses. The coils are made of thin, light-colored wire. Red boxes highlight the coils, and red lines connect them to labels: "Coil 1 Antenna" for the top-left coil and "Coil 2 Antenna" for the bottom-right coil. The background is a blue textured surface.
