Subject; **Modular Transmitter Application**

Company name: SUNS Electric(Zhangzhou) Co.,Ltd.
FCC ID: 2AODW-E01-ML01SP2

Dear Sir/Madam,

This letter includes the FCC application requirements for Modular Transmitter Approval Request for;-

FCC KDB 996369 D01 'Module Certification Guide v04r02'; and
FCC KDB 996369 D03 "OEM Manual v01r01".

In accordance with 47CFR 15.212 Modular Transmitters and KDB 996369 D01 'Module Certification Guide v04r02', FCC ID **2AODW-E01-ML01SP2** has been examined against the following requirements.

Item	Requirement per 15.212 and KDB 996369 D01	Y/N	Explanation from Grantee (Explain why product complies/how it is achieved)
1	The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	N	Refer to external photos. This module doesn't have shield cover total
2	The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	Y	All inputs to the modules are buffered logic or microprocessor inputs, total complies the requirement. Please refer to Schematics.
3	The modular transmitter must have its own power supply regulation.	Y	Yes, the modular transmitter have its own power supply regulation.
4	The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	Y	Yes, the modular transmitter comply with the antenna and transmission system requirements of 15.203, 15.204(b) and 15.204(c), it employ a 'Permanent fixed PCB antenna total complies the requirement, please refer to internal photos.
5	The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing for compliance with part 15 requirements. Unless the transmitter module will be battery powered, it must comply with the AC line conducted requirements found in § 15.207. AC or DC power lines and data input/output lines connected to the module must not contain ferrites, unless they will be marketed with the module (see § 15.27(a)). The length of these lines shall be the length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals,	Y	Yes, the modular transmitter has been tested in a stand-alone configuration

SUNS Electric(Zhangzhou) Co.,Ltd.

	or support equipment connected to the module during testing shall be unmodified and commercially available (see § 15.31(i)).		
6	The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Y	Yes, the modular transmitter have a permanently affixed label displaying its FCC identification number
7	The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	Y	Yes, the modular transmitter comply with FCC rules, and the detail reflected in user manual.
8	Radio frequency devices operating under the provisions of this part are subject to the radio frequency radiation exposure requirements specified in §§ 1.1307(b) , 1.1310 , 2.1091 , and 2.1093 of this chapter , as appropriate. Applications for equipment authorization of modular transmitters under this section must contain a statement confirming compliance with these requirements. The modular transmitter must comply with any applicable RF exposure requirements in its final configuration. Technical information showing the basis for this statement must be submitted to the Commission upon request.	Y	It's complies, please refer to the MPE report and user manual
