Technical Parameters	HLT-311	HLT-312	HLT-313
Maximum current:	10A	16A	10A
Rated voltage:	110-125V	110-125V	90-265V
Rated power:	1100W	1800W	2300W
Input voltage:	110-125V	110-125V	90-265V

Wireless Type: Wi-Fi2.4GHz
 Operating temperature: 0℃ - 40℃
 Support system: Alexa/Home/IFTTT
 Support mobile: Android/iOS

Make sure your phone is connected to WiFi in your home. Click "+" in the upper right corner of the homepage and select "Electrical outlet" from the device type.

-5-

Step 3: Enter your Wi-Fi password for your phone and click "Confirm" to enter the page of the search device.

-7-

Step 4: Enter the device page, then complete the configuration

The image displays two screenshots from the Amazon Alexa mobile application. The left screenshot shows the 'Smart socket' control interface. At the top, there's a status bar with 'Clock' and 'Smart socket' labels. Below is a large circular power button icon. Underneath the button, it says 'Socket is on'. At the bottom, there are three icons labeled 'Switch', 'Countdown', and 'Timer'. The right screenshot shows the 'Add Device' screen. It features a large green plus icon in the center. Above it, the text 'Add Device' is visible. Below the plus icon, it says 'Successfully added 1 device(s)'. Underneath this, there's a list item for 'Smart socket' with an edit icon. At the bottom, there are two buttons: 'Share with family' and 'Done'.

Step 4: Enter the device page, then complete the configuration

The image displays two screenshots from the Amazon Alexa mobile application. The left screenshot shows the 'Smart socket' control interface. At the top, there's a status bar with 'Clock' and 'Smart socket' labels. Below is a large circular power button icon. Underneath the button, it says 'Socket is on'. At the bottom, there are three icons: 'Switch', 'Countdown', and 'Timer'. The right screenshot shows the 'Add Device' screen. It features a large green plus icon in the center. Above it, the text 'Add Device' is visible. Below the plus icon, it says 'Successfully added 1 device(s)'. Underneath this message is a list item for 'Smart socket' with a blue pencil icon for editing. At the bottom, there are two buttons: 'Share with family' and 'Done'.

Step 1: Open the "Amazon Alexa" APP, then find the "Skills" button on the menu. Press it.

-9-

Step 2: Search the "Smart life" and choose the first one, then Enable it.

Step 3: Select your country code and Enter your "Smart life" APP Account and Password, then press the "Link Now" button. When the Account success to login press the "Done" button.

The screenshot shows the 'Account' setup screen in the Amazon Alexa app. The top bar is dark with the Amazon Alexa logo and a back arrow. Below the bar, there's a white area with the Amazon logo and the text 'To continue, close this window to discover devices you can control with Alexa.' The main content area is white and contains the 'Account' section. It has a dropdown menu for the country code (set to +86) and a text field for the email address. Below this is a 'Password' field with a toggle for 'Show password temporarily'. At the bottom is a 'Link Now' button. The bottom of the screen shows the iOS home indicator bar.

Step 4: Back to the menu, and press the “Smart home” button, then press the “Discover” button.

The image consists of three sequential screenshots of the Philips Hue mobile application interface. The first screenshot shows the main menu with options like 'Music, Video & Books', 'Lists', 'Alerts & Alarms', 'Skills', and 'Smart Home'. The 'Smart Home' option is highlighted with a red rectangle. The second screenshot shows the 'Smart Home' settings page with options like 'Configure Smart Home', 'Smart Home Skills', and 'Discover'. The 'Discover' option is highlighted with a red rectangle. The third screenshot shows the 'Discover' page with options like 'Groups', 'Devices', 'Scenes', and 'Smart Home Skills'. The 'Groups' option is highlighted with a red rectangle.

Step 5: Now u can use your Alexa to control your Smart devices, enjoy your self.

FCC STATEMENT:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm Between the radiator& your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
