

Install Wi-Fi Module

Connect the cable to the Type-C port.

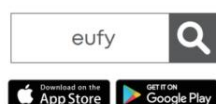

Place LongRange Access Point at least 3.94" / 10 cm away from the wall.

Avoid corners, cabinets, or basements to prevent signal obstruction.

Pairing & Check the Signal

① Download the eufy app, then sign in or create an account.

② Tap + > Add Device. Follow the in-app instructions to complete the pairing and check the signal.
