Subject; **Modular Transmitter Application**

**Company name: Sichuan AI-Link Technology Co.,Ltd.**  
**FCC ID: 2AOKI-AL5621D**

Dear Sir/Madam,

This letter includes the FCC application requirements for Modular Transmitter Approval Request for;-

FCC KDB 996369 D01 'Module Certification Guide v02; and  
FCC KDB 996369 D03 OEM Manual v01

In accordance with 47CFR 15.212 Modular Transmitters and KDB 996369 D01 'Module Equip Auth Guide v02'.

FCC ID:2AOKI-AL5621D has been examined against the following requirements.

| Requirement per 15.212 and KDB 996369 D01                                                                                                                                                                            | Explanation from Grantee<br>(do not write yes/no, but explain why product complies/how it is achieved) |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.                          | NO(The Module not have shielding case )                                                                |
| The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.                                                                  | Yes(The Module data inputs are buffered through log or micro-controller connections)                   |
| The module must contain power supply regulation on the module.                                                                                                                                                       | Yes (The EUTis contain power supply regulation on the module)                                          |
| The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b). | NO(The EUT no have a permanently attached antenna)                                                     |
| The module must demonstrate compliance in a stand-alone configuration.                                                                                                                                               | Yes(The Module was tested stand-alone)                                                                 |
| The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748).                                                                                     | NO(FCC ID lable in the manual )                                                                        |
| The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee.                                                  | Yes(please refer to the manual)                                                                        |
| The module must comply with RF exposure requirements                                                                                                                                                                 | Yes(please see the MPE report. The Module meet MPE calculation of 47 CFR 1.107(b)(1))                  |
