Features

- The 220DN light has fully adjustable angles, provides simple onboard controls as well as App control and can be used hand held or on a stand or with any other suitable support equipment.
- The 220DN provides a solar spectrum light source, RA 98, high colour fidelity, realistic and saturated colour IES TM30-18 index, Rf 97 and Rg100.
- The 220DN offers 8 different special lighting effects designed to suite various scenarios.
- There are 4 types of dimming curves to choose from.
- Connecting to the App via Bluetooth will provide further functions such as key frames, multi-lamp control and music mode.
- Key frame and sequence dimming are fully adjustable and can be preset to suit user requirements.
- Equipped with silent fans the 220DN will automatically adjust fan speed to accommodate the temperature of the light.
- The product has a 'High Temperature' warning function.

Precautions:

1. Keep dry. Do not expose the product to water, liquids, rain or moisture either whilst in use or when in storage. It is recommended that the product should not be handled using wet hands.
2. Do not disassemble or modify the product. Mishandling, including dropping the product, may result in permanent damage.
3. Please keep this product out of the reach of children and animals.
4. Do not use or store the light in the vicinity of harmful chemicals or combustible materials. Always read the warning labels prior to using the product.
5. Please use appropriate adapters for power supply and temperature specifications and range.
6. The effectiveness of the lamp will be impaired if the heat sink is blocked or covered.

Power Management

Power Supply

AC Power port
Input voltage: AC 100V~240V 50/60HZ
Input power: 240W

Temporary Lamp Shutoff

Press the power button to turn the light off, and press the power button again to turn the light on. Temporary light shutoff is a low-power mode. When the product is not in use, please check to make sure the product is fully shut down.

High Temperature Alert

When the display shows the 'Overheating Protection' warning, the brightness will be reduced. It is recommended to turn the lamp off, and then continue to use after the overall temperature of the light has reduced. Long-term use of this product in high temperature conditions will affect the life of the device.

Bluetooth Connection

■ Bluetooth Connection and Reset

1. For Bluetooth connection: download the iFootage Lumin App to your mobile device (Smartphone or tablet). Once registered, open the Lumin App and create a new project. Open the project and search for devices, select the appropriate device using the device name or code to connect via Bluetooth. The light will blink three times to show a successful Bluetooth connection. Via the project device list, select to control single or multiple devices. The Bluetooth icon will appear on the status bar after which you can set the internal lighting values. If the APP shows Bluetooth connection failure, please check to see that your mobile device is Bluetooth enabled or reset Bluetooth on the product and try to reconnect.
2. Bluetooth Reset: Using the device screen, press BT to access the Bluetooth setting. rotate dial and select 'Bluetooth Reset', then press the "Confirm & select" control.
