Слот 1: TF Card

Слот 2: Nano SIM

Слот 3: Nano SIM

Увага:

- 1) Не використовуйте карту вирізану вручну або карту невірного типу — це може привести до пошкодження пристрою.
- 2) Проводьте маніпуляції з картами тільки коли телефон вимкнено.
- 3) Підтримуються карти пам'яті до 64ГБ.

Стандарти мереж, що підтримуються:

GSM: B2/3/5/8(1900/1800/850/900)

WCDMA: B1/2/5/8(2100/1900/850/900)

CE Warning

1. Use careful with the earphone maybe possible excessive sound pressure from earphones and headphones can cause hearing loss.

2. CAUTION:
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

3. The product shall only be connected to a USB interface of version USB2.0.

4. Adapter shall be installed near the equipment and shall be easily accessible.

5. Operation temperature:-10~40C

6. The plug considered as disconnect device of adapter.

7. SAR:

The device complies with RF specifications when the device used at 5mm from your body (SAR limit 2.0W/Kg). The device is in compliance with the requirements.

This information has to be presented in such a way that the user can readily understand it. Typically, this will necessitate translation into every local language (required by national consumer laws) of the markets where the equipment is intended to be sold. Illustrations, pictograms and using international abbreviations for country names may help reduce the need for translation.

IC Caution

EN

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

FR

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

1. L'appareil ne doit pas produire de brouillage;
2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

SAR Statement:

Mobile Phone has been tested and meets applicable limits for radio frequency (RF) exposure. Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. The SAR limit is 1.6 watts per kilogram in Canada that set the limit averaged over 1 gram of tissue. During testing, Mobile Phone (IC: 12564A-3110) radios are set to their highest transmission levels and placed in positions that simulate uses against the head, with no separation, and when worn or carried against the torso of the body, with 10mm separation. To reduce exposure to RF energy, use a hands-free option, such as the built-in speaker phone, the supplied headphones, or other similar accessories. Cases with metal parts may change the RF performance of the device, including its compliance with RF exposure guidelines, in a manner that has not been tested or certified. Although this device has been tested to determine SAR in each band of operation, not all bands are available in all areas. Bands are dependent on your service provider's wireless and roaming networks.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

SAR statement

This Product meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of this Device GQ3110 (FCC ID: 2AOWK-3110) has been tested against this SAR limit. SAR information on this can be viewed on-line at <http://www.fcc.gov/oet/ea/fccid/>. Please use the device FCC ID number for search. This device was tested for typical operations 10mm from the body. To maintain compliance with FCC RF exposure requirements, 10mm separation distance should be maintained to the user's bodies

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However,

there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The object of the declaration described above is in conformity with the essential requirements of the relevant Union harmonization legislation:
Radio Equipment Directive RED (2014/53/EU).

The harmonized standards and technical specifications are as follows:

HEALTH & SAFETY (Art. 3(1)(a)):
EN 50360:2017; EN 50566:2017; EN 62209-1:2016;
EN 62209-2:2010; EN 62479:2010
EN 62368-1:2014+A11:2017

EMC (Art. 3(1)(b)):
ETSI EN 301 489-1 V2.2.3 (2019-11)
ETSI EN 301 489-17 V3.2.4 (2020-09)
ETSI EN 301 489-19 V2.1.1 (2019-04)
ETSI EN 301 489-52 V1.2.1 (2021-11)
EN 55032:2015+A1:2020
EN 55035:2017+A11:2021
EN IEC 61000-3-2:2019+A1:2021
EN 61000-3-3:2013+A2:2021

Radio Spectrum (Article 3.2):
EN 301 511 V12.5.1 (2017-03);
EN 301 908-1 V13.1.1 (2019-11);
EN 301 908-2 V13.1.1 (2020-06);
EN 300 328 V2.2.2 (2019-07);
EN 301 893 V2.1.1 (2017-05);
EN 300 440 V2.2.1 (2018-07);
EN 303 345-1 V1.1.1 (2019-06);
EN 303 345-3 V1.1.1 (2021-06);
EN 303 413 V1.2.1 (2021-04);

The product have been applied the above standards according to the different functions supported.
For details, please refer to the product CE report.
