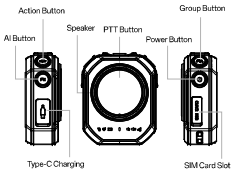
RugOne

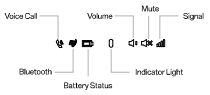
Xlink 7

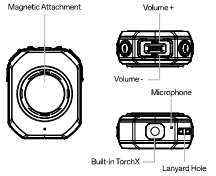
USER MANUAL

Network Bands:
LTE:1/3/7/8/20/28/34/38/40

Product Introduction







SIM Card Installation

Open the rubber seal on the SIM card slot and insert the SIM card following the direction shown in the picture.

Note: Included SIMs come with 12 months of service (activates on first use). If your package does not include a SIM, please provide a compatible SIM.

Powering On

Press and hold the Power button for 2 seconds. Once you hear the startup tone, the screen will light up, and the device will automatically connect to the network.

App Pairing

This device requires activation via the RugOne Xlink App.

1. Download the App

Search for "RugOne Xlink" in the App Store or Google Play, or scan the QR code below to install.

RugOne Xlink App
Android/iOS

2. Add Your Device

- Open the RugOne Xlink App and log in.
- Tap "Add Device" on the home screen.
- Double-click the Power button on the walkie-talkie to enable Bluetooth.
- Select the Bluetooth button in the app and follow the prompts to pair.
- Once connected, your device will appear on the home screen. You can tap the device to rename it.

Team Communication

Creating a Group

- Double-click the Group button. You will hear a voice prompt: "Creating group, joining group [ID]."

Join a Group

- Double-click the Action button to search for the group [ID] and join the group.

Switching Groups

- Single-click the Group button to enter Group Switch mode.
- Press the Volume + button to scroll through available groups.
- Single-click the Group button to confirm your selection.

Network Intercom

While connected to the network, users in the same group can press and hold the PTT (Push-to-Talk) button to transmit voice.

Full-Duplex 5-Way Real-Time Calling

In the RugOne Xlink App, go to "Device Details" and select the "Quick Voice Call" menu. This supports two-way real-time communication for up to 5 devices.

- **Start Call:** Long press the Group Button.
- **Answer Call:** Single press the PTT button until you hear a "beep" to enable hands-free mode (no need to hold the button).
- **Reject Call:** Long press the PTT Button to reject.
- **End Call:** Long press the PTT button.

⚠ WARNING — Contains Coin Battery. Hazardous if swallowed.

Scan for Digital Manual

- **[EN] Scan for detailed manual and safety info.**
- **[DE] Scannen: Ausführliche Anleitung und Sicherheit.**
- **[RU] Сканируйте: Подробная инструкция и безопасность.**
- **[UA] Скануйте: Детальна інструкція та безпека.**
- **[FR] Scannez pour le manuel détaillé et la sécurité.**
- **[ES] Escanee para manual detallado y seguridad.**
- **[PT] Escaneie para manual detalhado e segurança.**
- **[IT] Scansiona per manuale dettagliato e sicurezza.**
- **[AR] امسح للحصول على الدليل المفصل ومعلومات السلامة**
- **[JP] スキャンして詳細ガイドと安全情報を確認。**

CE Warning

Health and Safety

Warning!To avoid electric shock and damage to your device,do not charge device while it is wet or in an area where it could get wet.Do not handle device,charger or cords with wet hands while charging.

CAUTION: RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE, DISPOSE OF USED BATTERIES ACCORDING

Correct disposal

This marking on the product accessories or literature indicates that the product and its electronic accessories(e.g.charger,headset,USB cable)should not be disposed of with other household waste.

This marking on the battery,manual or packaging indicates that the batterers in this product should not be disposed of with other household waste.

Care for the environment! Must not be discarded with household waste!

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The maximum SAR values tested on this device when used in its normal position when used close to the body (at a minimum distance of 0mm) are :-

Max SAR Value(W/kg)- Limit is 1.6(W/kg) for1-g.-	1-gBody -/	1.143/-

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules that devices comply with two main conditions:

1.They must not cause harmful interference.

2.They must accept any interference received,including that which may cause undesired operation.

This product meets the government's requirements for exposure to radio waves.The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies.The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF exposure information and statement the SAR limit of USA(FCC)is1.6W/kg averaged over one gram of this Device GR2001(FCC ID: 2AOWK-GR2001)has been tested against this SAR limit.The SAR information related to this aspect can be viewed online at http://www.fcc.gov/oet/ea/fccid/.Please use the device FCC ID number for search.This device was tested for typical operations 0mm from the body. To maintain compliance with FCC RF exposure requirements, 0mm separation distance should maintained to the user's bodies.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device,pursuant to Part 15 of the FCC Rules.These limits are designed to provide reasonable protection against harmful interference in a residential installation.This equipment generates,uses and can radiate radio frequency energy and,if not installed and used in accordance with the instructions,may cause harmful interference to radio communications.

However,there is no guarantee that interference will not occur in a particular installation.If this equipment does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on,the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

IC Caution

EN

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s).

Operation is subject to the following two main conditions:

1.They must not cause harmful interference.

2.They must accept any interference received, including that which may cause undesired operation.

SAR Statement:Walkie Talkie has been tested and meets applicable limits for radio frequency (RF) exposure.Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy.The SAR limit is 1.6 watts per kilogram in Canada that set the limit averaged over 1 gram of tissue.During testing,Walkie Talkie (IC: 12564A-GR2001) radios are set to their highest transmission levels and placed in positions that simulate uses against the head,with no separation,and when worn or carried against the torso of the body,with 0mm separation.To reduce exposure to RF energy,use a hands-free option,such as the built-in speaker phone,the supplied headphones,or other similar accessories.Cases with metal parts may change the RF performance of the device, including its compliance with RF exposure guidelines,in a manner that has not been tested or certified.Although this device has been tested to determine SAR in each band of operation,not all bands are available in all areas.Bands are dependent on your service provider's wireless and roaming networks.

FR

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation,Sciences et Développement économique Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes:

1.L'appareil ne doit pas produire de brouillage.

2.L'appareil doit accepter tout brouillage radioélectrique subi,même si le brouillage est susceptible d'en compromettre le fonctionnement.

Déclaration SAR : Le walkie-talkie a été testé et respecte les limites applicables à l'exposition aux radiofréquences (RF). Le débit d'absorption spécifique (DAS) désigne la vitesse à laquelle le corps absorbe l'énergie des radiofréquences. Au Canada, la limite du DAS est de 1,6 watts par kilogramme, la moyenne étant calculée sur 1 gramme de tissu. Lors des tests, les radios de walkies-talkies (IC : 12564A-GR2001) sont réglées sur leur niveau d'émission le plus élevé et placées dans des positions simulant une utilisation contre la tête, sans séparation, et lorsqu'elles sont portées ou transportées contre le torse du corps, avec une séparation de 0mm. Pour réduire l'exposition à l'énergie RF, utilisez une option mains libres, telle que le haut-parleur intégré, les écouteurs fournis ou d'autres accessoires similaires. Les étuis comportant des pièces métalliques peuvent modifier les performances RF de l'appareil, y compris sa conformité avec les directives d'exposition aux RF, d'une manière qui n'a pas été testée ou certifiée. Bien que cet appareil ait été testé pour déterminer le DAS dans chaque bande de fonctionnement, toutes les bandes ne sont pas disponibles dans toutes les régions. Les bandes dépendent des réseaux sans fil et d'itinérance de votre fournisseur de services.
