

X-Brain(V2)

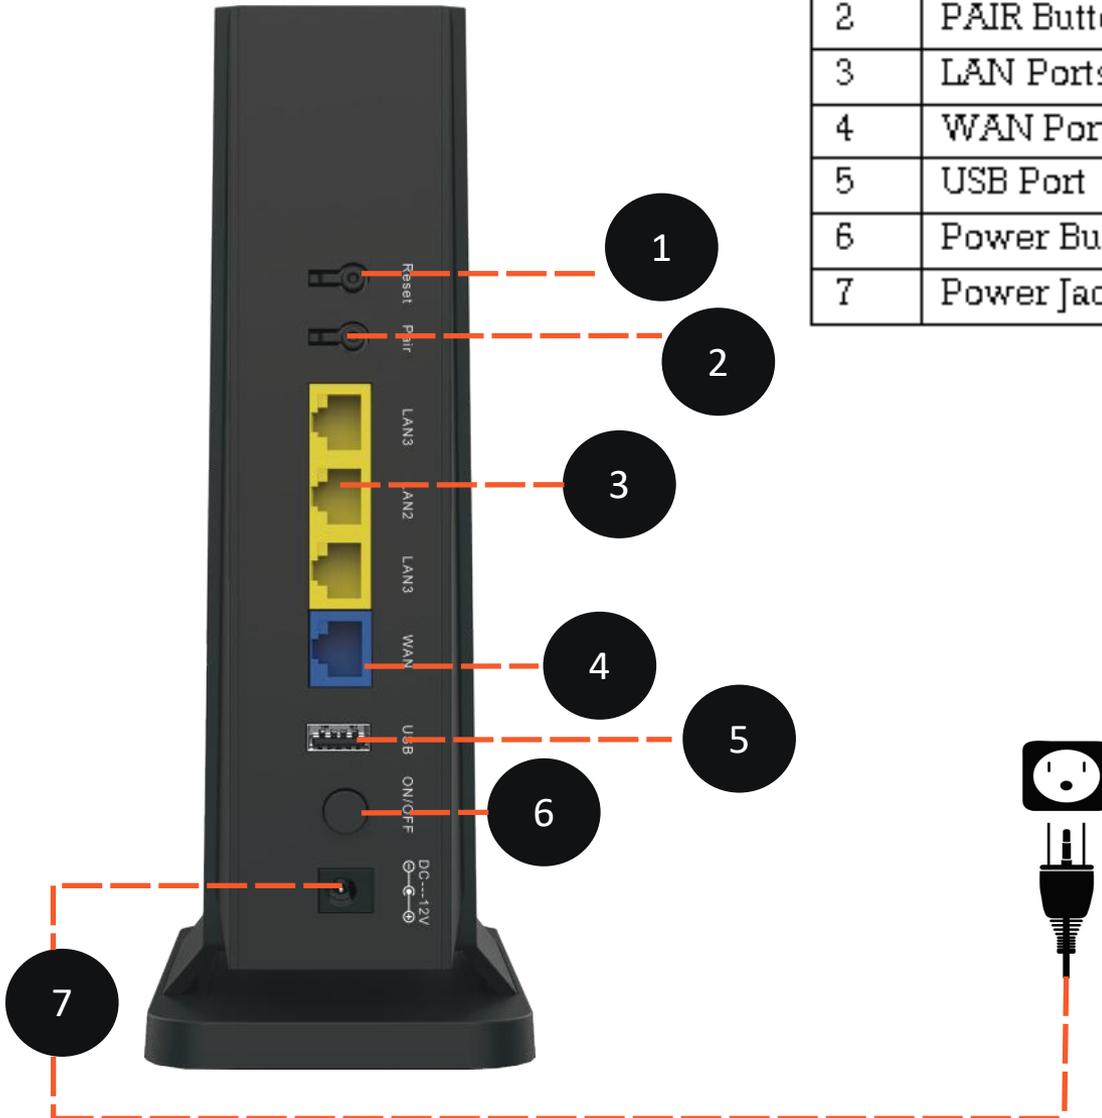

Quick Start User Manual

xunison
www.xunison.com

To setup X-Brain ,connect 1) Power cable, 2) Ethernet cable(if applicable).

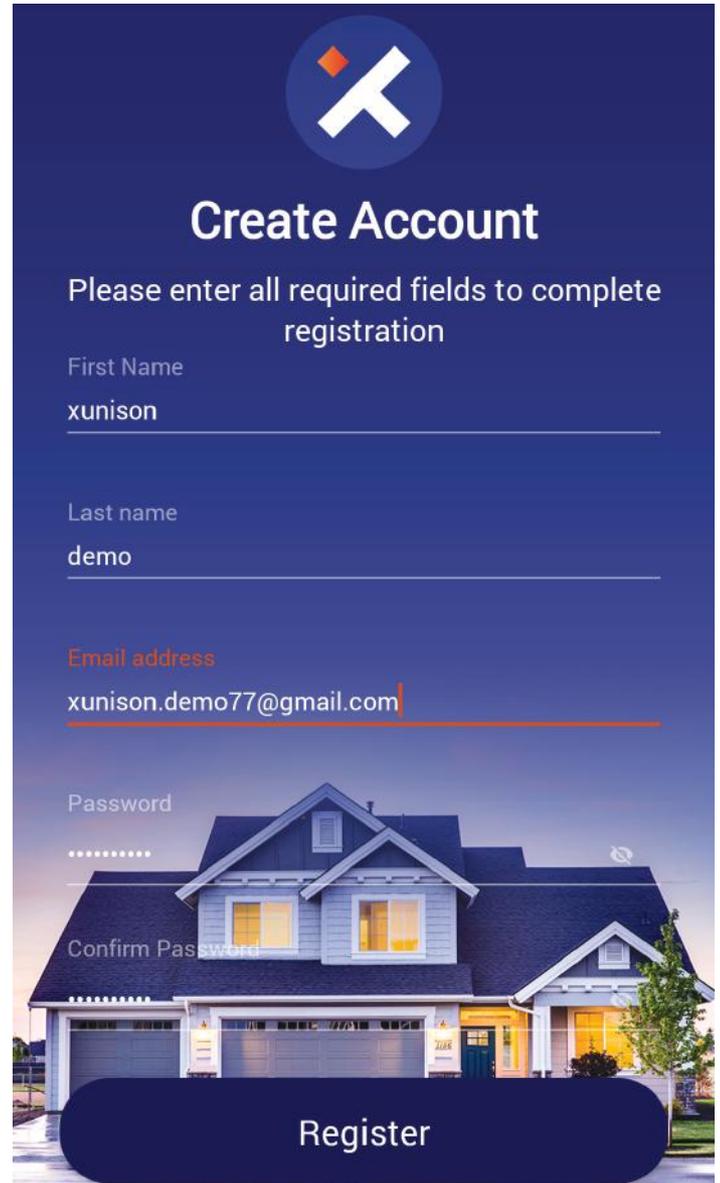

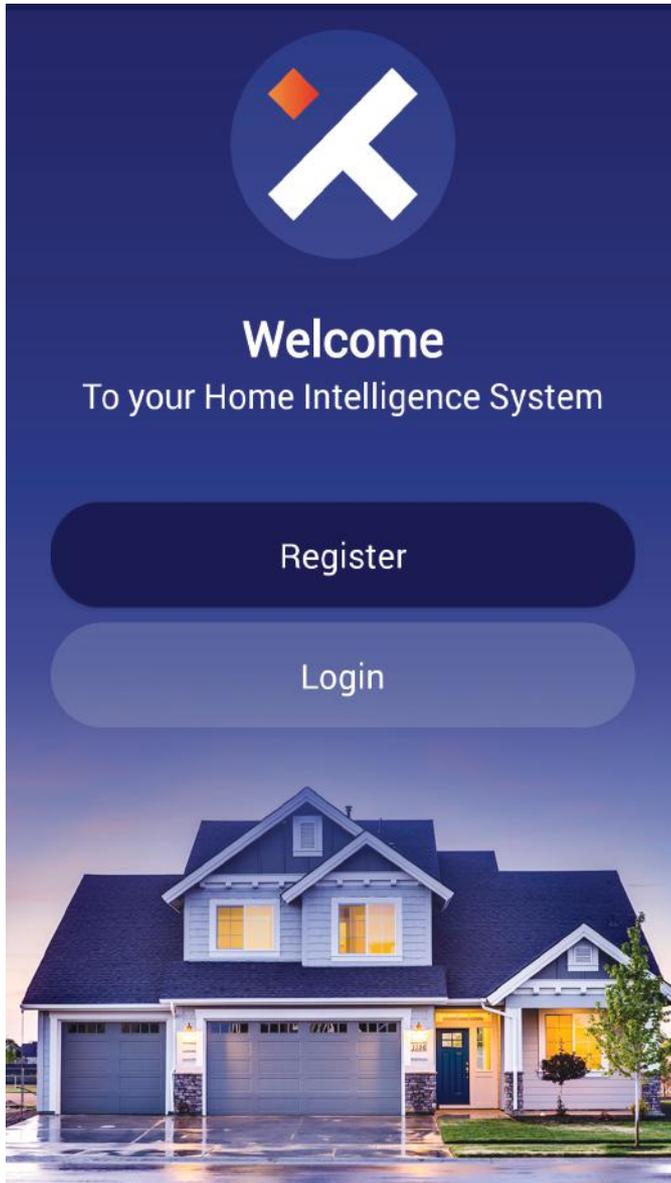

1	Factory Reset
2	PAIR Button
3	LAN Ports
4	WAN Port
5	USB Port
6	Power Button
7	Power Jack

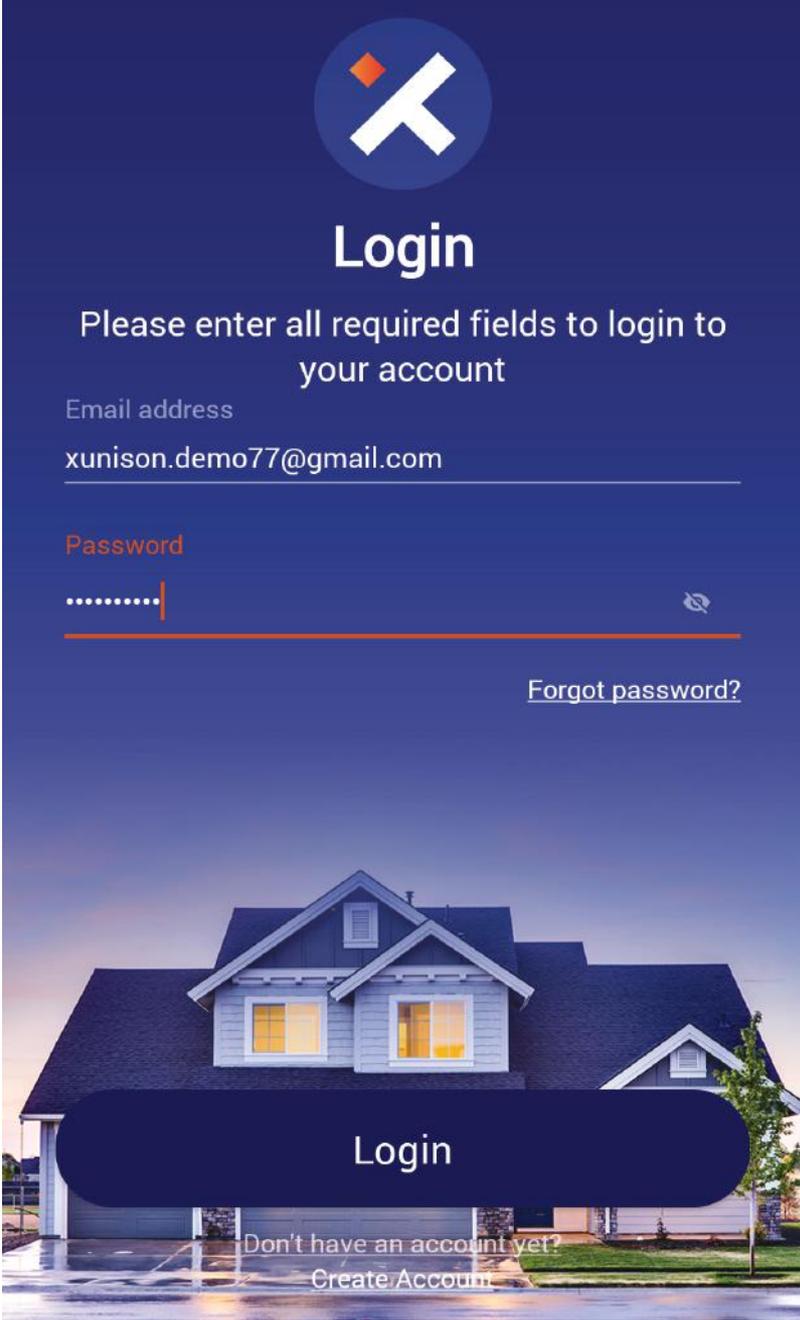

Android/iOS Application

Download and Install X-Home application from the Playstore/Appstore

Step 1: Open X-Home application, Press "Register". Enter registration details.

Step 2: Enter Registered email address and password to “Login”.

The image shows a login form for Xunison. At the top is the Xunison logo, a white 'X' with an orange diamond on a blue circle. Below it is the word 'Login' in white. The form asks the user to enter their email address and password. The email address field contains 'xunison.demo77@gmail.com'. The password field is masked with dots and has a visibility icon. A 'Forgot password?' link is located below the password field. At the bottom of the form is a large blue button labeled 'Login'. Below the button is a link that says 'Don't have an account yet? Create Account'. The background of the form is a dark blue gradient with a photo of a house at the bottom.

Login

Please enter all required fields to login to your account

.com

Please select a home you want to
control

Add New Home

Logout

Connect your Home

SCAN QR Code printed on the sticker on
the
bottom of your XBrain or connect your
mobile
to XBrain Network and run LAN SEARCH

Scan QR Code

LAN Search

Step 4: Press on the Gateway UID. Enter the name of your Gateway.

Connect your Home

Found gateway

gwe88d6f67ae134b36a666bbe53304d2af

Add gateway

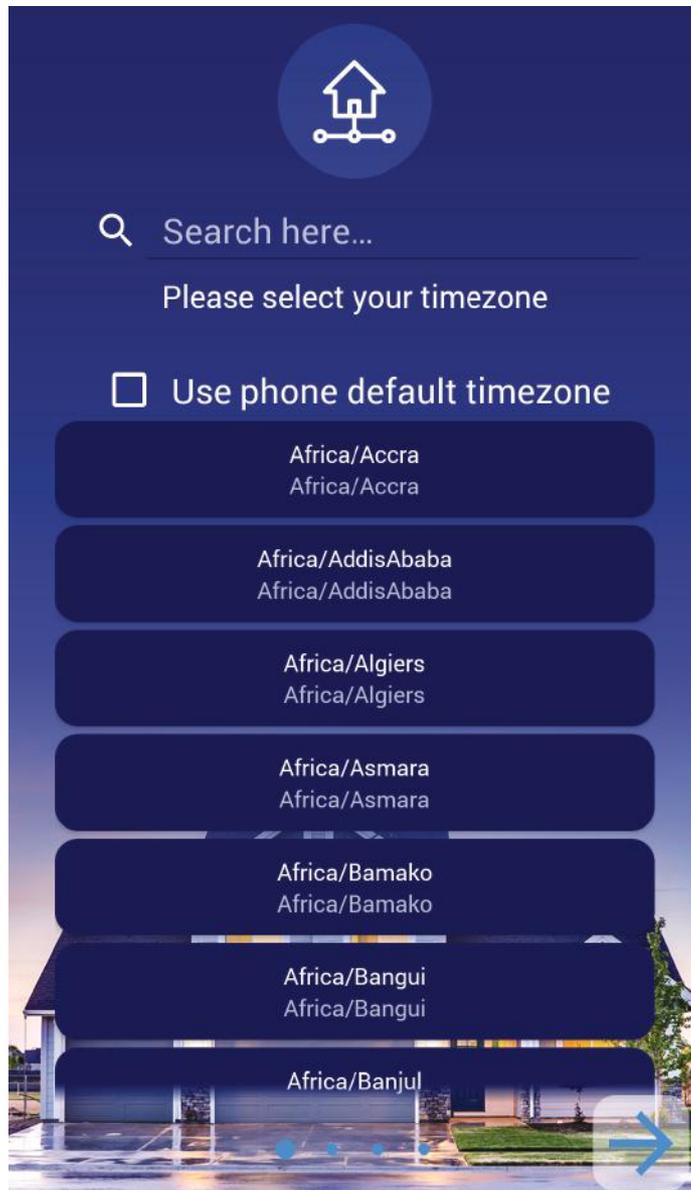

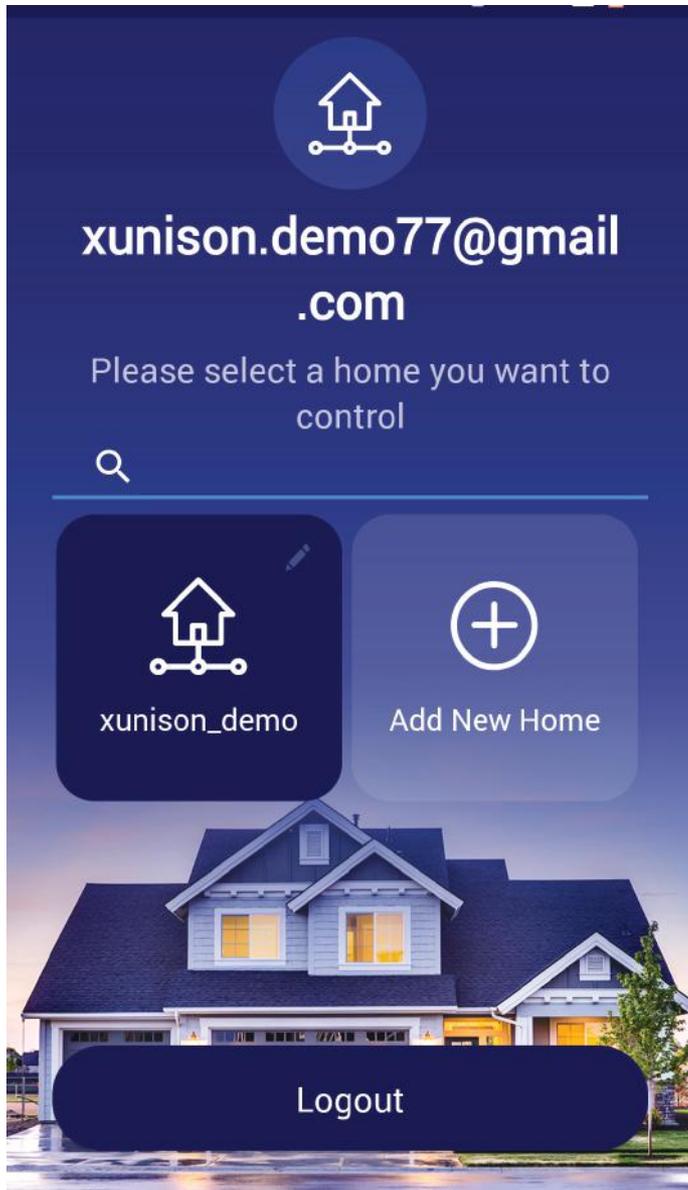

Please set a name for your gateway

Gateway Name

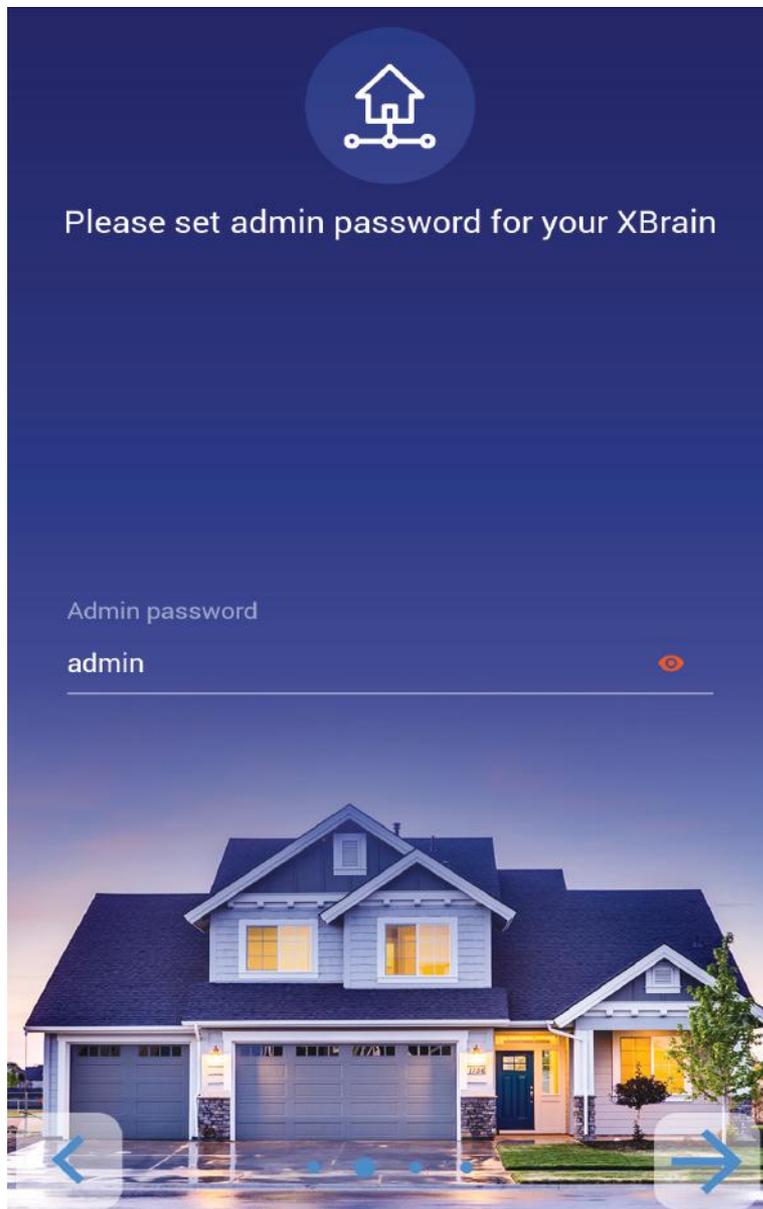

demo_xunison

Done

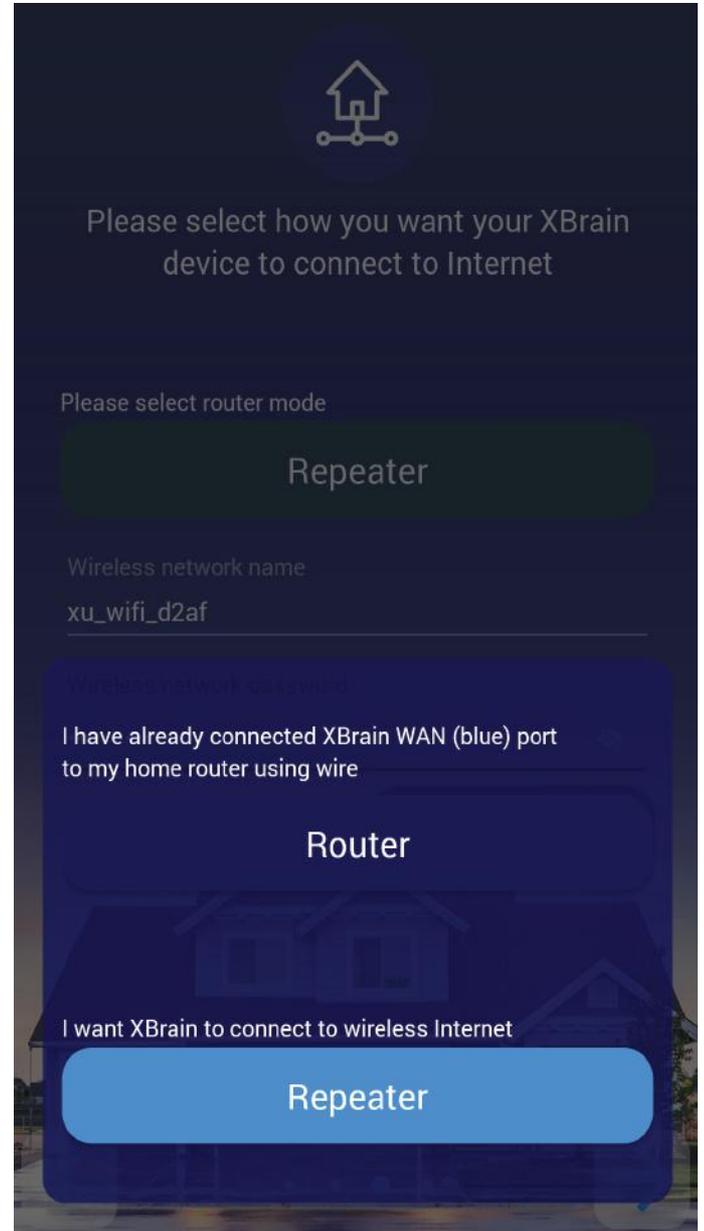

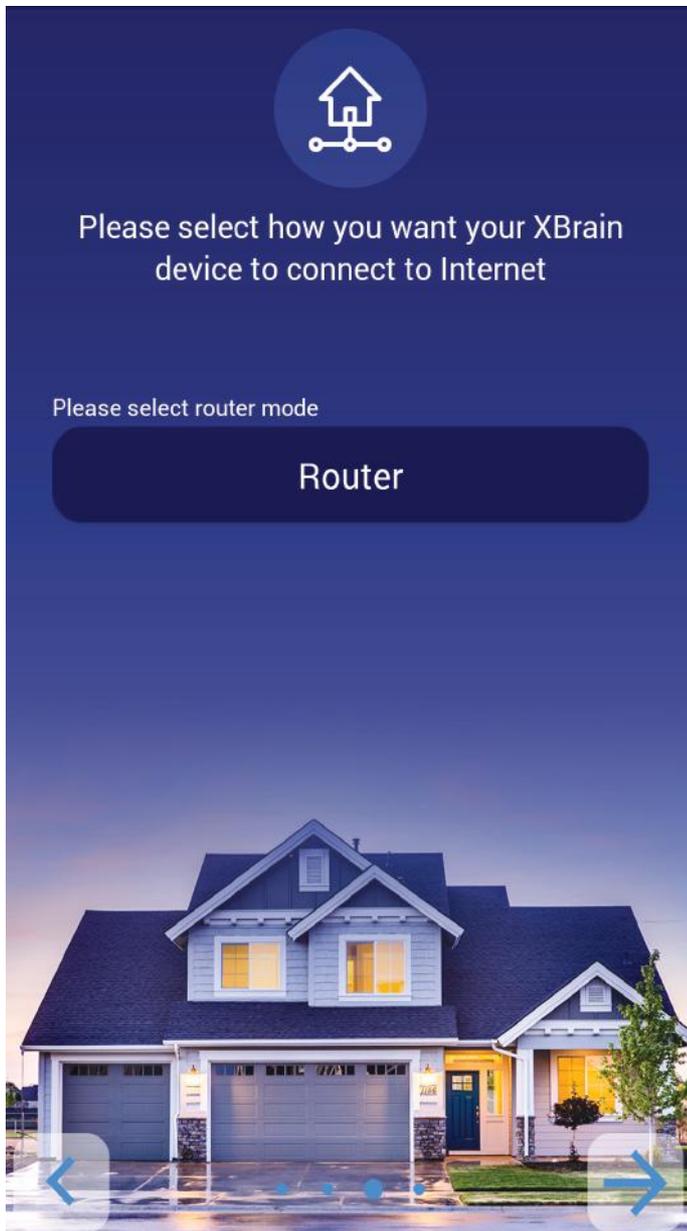

Step 5: New Home Gateway added, press on the Gateway.
Choose default timezone.

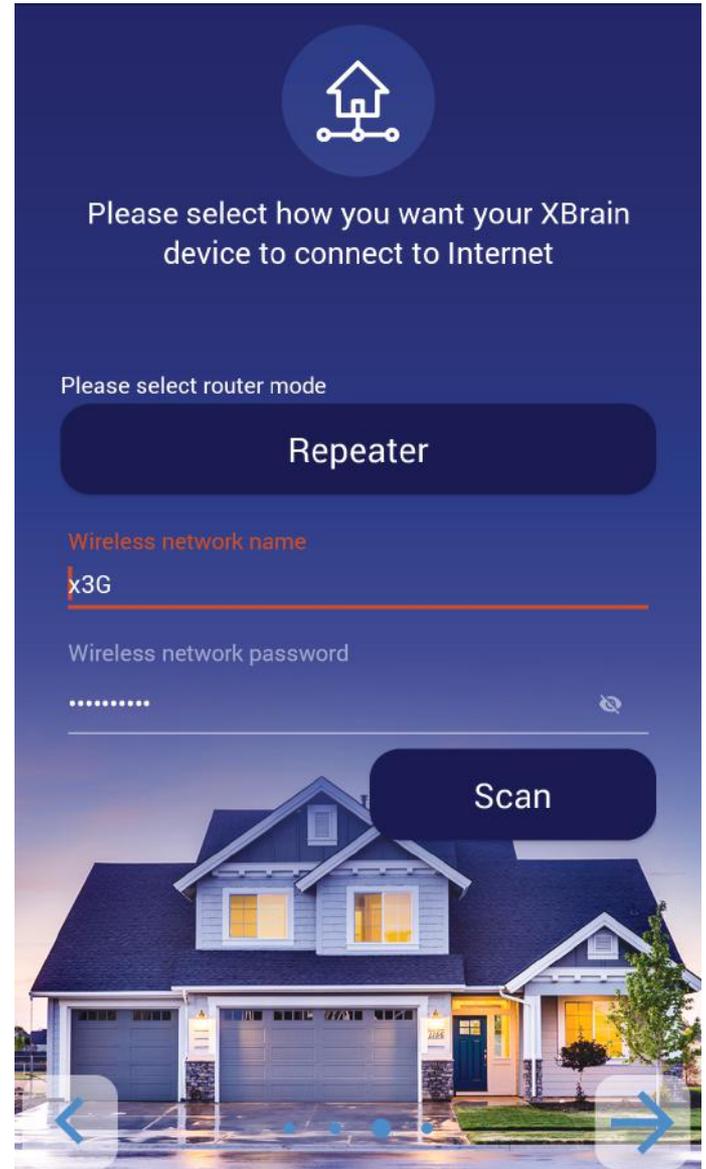

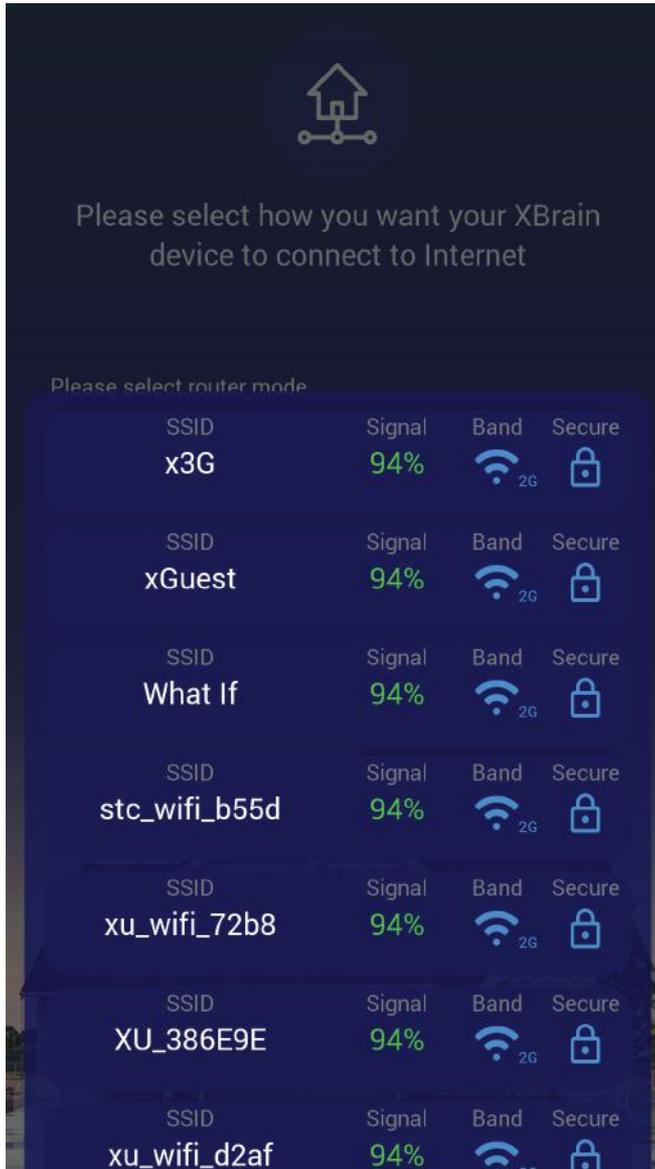

Step 6: Enter the router admin password given on the label printed at the bottom of your Gateway.

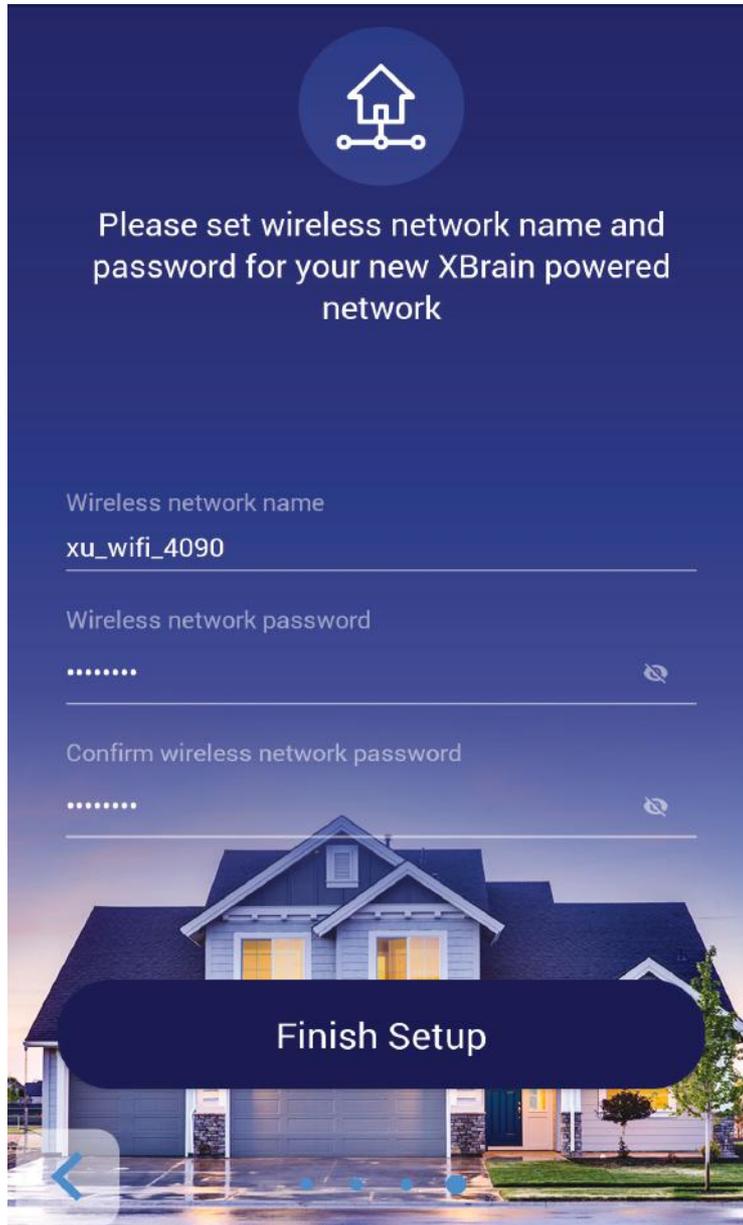

Step 7: From here you can select either router mode (Connect Ethernet from ISP router to WAN port) or repeater mode (Connect wirelessly to your existing ISP device).

Step 8: Press "SCAN" and select the Wi-Fi SSID to setup the repeater mode

Step 9: Enter the Wi-Fi SSID and the password. press “Finish Setup”

The screenshot shows a dark blue setup screen with a white house and network icon at the top. The text reads: "Please set wireless network name and password for your new XBrain powered network". Below this are three input fields: "Wireless network name" with the text "xu_wifi_4090", "Wireless network password" with masked characters "....." and a toggle icon, and "Confirm wireless network password" also with masked characters and a toggle icon. At the bottom, there is a large dark blue button labeled "Finish Setup" and a navigation bar with a back arrow and four dots.

Please set wireless network name and password for your new XBrain powered network

Wireless network name
xu_wifi_4090

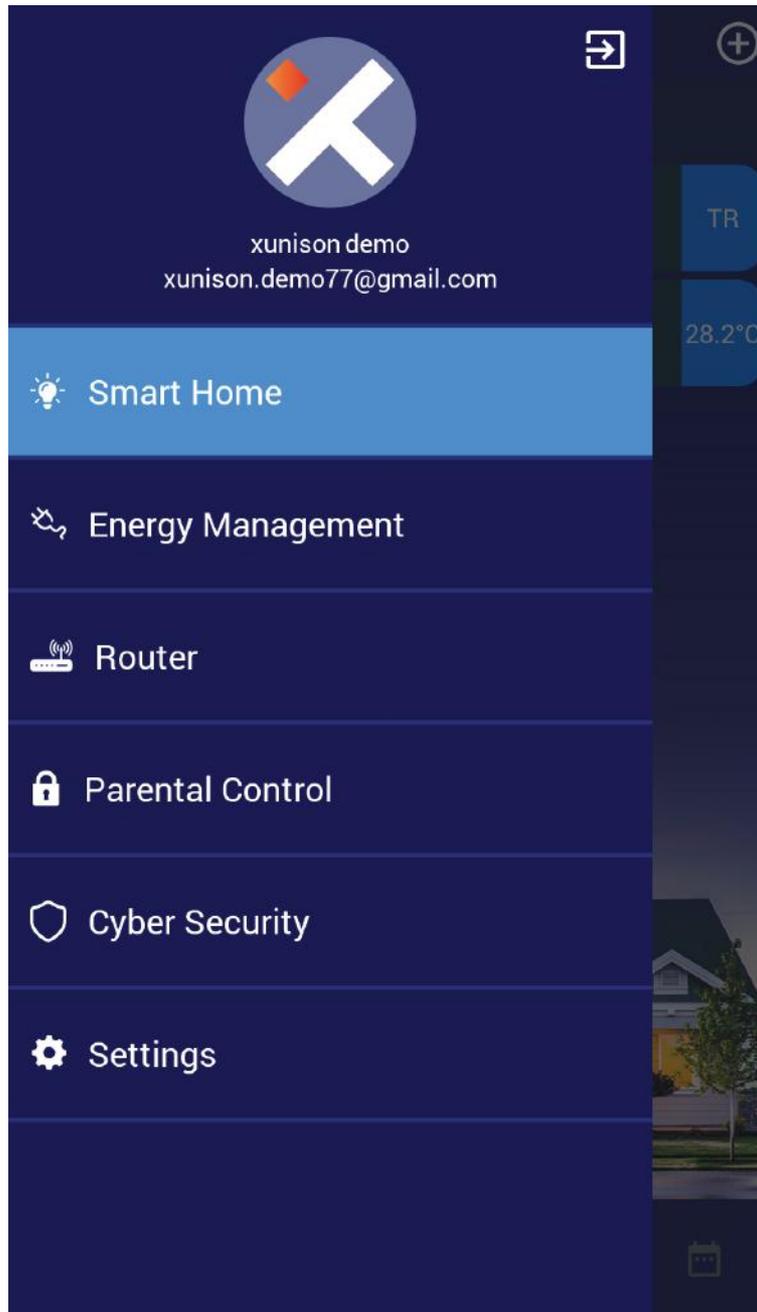

Wireless network password
.....

Confirm wireless network password
.....

Finish Setup

Note: If you have setup repeater mode, disconnect the ethernet cable from the X-Brain device once the setup is complete.

Step 10: Once the setup is complete,select your Gateway.
The Home screen appears as shown here

FCC Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
