

Magnet Wireless Charger

User Manual

Modle: IPR26

Note: For best performance and safety, please read this manual carefully before using this product.

Construction of Product

2. Wireless Charging Area

User Instruction:

Step:1. Connect with wall charger

plug the type-C connector into the charger so as to ensure it is in standby mode.

Note: In order to get the best charging effect, please use the adapter that meets the PD standard. In order to save energy and extend the product life, please cut off the power when your phone fully charged to avoid wasting energy.

Step:2. Charging your iPhone

Please fit the product with the back of your iPhone, it will charge your iPhone automatically via the built-in magnetic wireless charging, Max to be 15W.

Attention:

- ★ Under normal charging conditions, the charger and mobile phone could be slightly hot; the temperature may rise if the mobile phone is working while charging (such as playing video).
- ★ Please stop charging your phone when the charger is over-heating. Our product will automatically stop charging when over-heating. Please try it again when it's cooling down.

Specifications:

Input	5V $\leftrightarrow$ 3A, 9V $\leftrightarrow$ 2.22A, 12V $\leftrightarrow$ 1.67A, 15V $\leftrightarrow$ 2.33A
Output (under optimised conditions)	25W max.
Dimensions	Ø 59.2 mm x 19 mm
Connection	USB-C (PD)
Cable length	1 m
Operating frequency range:	115-205kHz: 5W, 7.5W, 10W; 360kHz: 15W, 25W

Warning

- Keep bank cards or similar cards with magnetic strips away from the magnets. The data on the cards' magnetic strip could be damaged or completely deleted.
- People with pacemakers should keep away from the magnets. The magnets can negatively affect the function of the pacemaker.
- Ensure that there are no metal parts (e.g. metal plate for magnetic holders) on the back of your device. Metal heats up significantly in the field of an induction charger and can damage your device and/or the charger.
- Note that covers, etc., and other materials between the wireless charger and the back of your device may interfere with or even prevent the charging process.

Hereby, [Shenzhen Esorun Technology Co., Ltd.] declares that the radio equipment type [Magnet Wireless Charger IPR26] is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: www.esorun.com.

Company Name: Shenzhen Esorun Technology Co., LTD

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
