Connecting with your Device:

- Keep your Bluetooth Device within 3 Ft. while Pairing.
- Press the Power button of TAGG FLEX.
- Blue and Red LED will blink and it means that the speaker is in the pairing mode.
- Now search for Available bluetooth devices in your Mobile/Laptop/iPad and select TAGG FLEX from the list of available devices.
- If prompted, enter password or PIN required "0000".
- If prompted by your mobile phone to connect, click "YES".
- After successfully connecting Blue LED will flash twice after every 4 secs.

How to Charge:

- Connect the speaker to the power using Micro USB cable.
- To better protect the battery life, kindly use only the charging cable provided with the headset < 5V, 100 mA - 240 mA.
- Allow 2-3 hours to completely charge the speaker.

LED Indications:

- While Charging - Red LED is On.
- When completely charged - RED LED is Off.
- When battery is low, Red LED blinks every four seconds twice and the voice prompt will let you know that battery status.
- Pairing Mode- Blue and Red LED starts Flashing.

Reconnect the Speaker:

- If the connection is lost, TAGG FLEX will try to reconnect automatically.
- If it does not reconnect, kindly press the Power button for 3 secs and reconnect manually through your mobile Bluetooth.

Common Problems and Solution

- **Mobile Can't Find the Speaker:**
 - Kindly restart your phone and the speaker.
- **There's always noise and the Bluetooth keeps disconnecting:**
 - The Speaker needs to be charged.
 - Make sure you are not beyond the signal distance.
- **Bluetooth is connected but you are unable to listen to music:**
 - Check your setting to adjust the sound of speaker.
 - Some mobiles require you to select the device twice.
 - Some mobile devices do not have compatibility with stereo bluetooth speaker kindly connect the speaker with another device to check if it is functioning properly.
- **Bluetooth Password:**
 - "0000"
- **Maximum Distance:**
 - 10 ft.
- **Red LED is not ON while charging:**
 - This could be due to lack of use of Speaker. It needs to be charged for 30 min before the Red LED occurs.
- **Restore To Factory Setting:**
 - To restore to factory settings, hold the Power Button for about three seconds when charging until the red and blue LED flashes three times.

Accessories List:

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
