

Download and install the app

Method 1: Scan the QR code to download and install the app

Method 2: Search for "Cam180" in the App Store or Google Play, then download and install it

Cam180

Register and log in

1. New users need to register an account. Tap Register to enter the registration page
2. Select your country, then enter your phone number or email address, password, and verification code. Tap Register to complete
3. Log in to Cam180 using the registered username and password

Add a camera

1. Power on the camera. It will rotate for self-checking for about 10 seconds, then play the voice prompt “waiting for connection”

If there's no prompt, press and hold the reset button for 7 seconds to reset and try again

2. Tap the “+” icon in the top-right corner to add a device. Select Scan QR code, scan the code on the device (ensure your phone's Bluetooth is enabled), and follow the instructions.

Adding methods

1. Supports three methods: Scan QR code, Bluetooth, or Wired connection (for devices with RJ45 ports only)
2. Tap "+" to add a device. The app will automatically search for powered devices. Follow the instructions to bind and choose the network connection method

Home screen features

1. On the home screen, users can select the camera live view and tap to enter
2. In the live view screen, users can use voice intercom, take snapshots, record videos, control the PTZ, and view alert notifications

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two

conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
