

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the external components of the EUT. On the left is a black plastic housing with a rectangular cutout. To its right is a small, round, silver coin cell battery. Both items are placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left and horizontally at the bottom for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
EUT Housing and Board View 2	 A photograph showing the internal components of the EUT. On the left is a white printed circuit board (PCB) with several circular components. To its right is a green PCB with various electronic components, including resistors and capacitors. Both boards are placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left and horizontally at the bottom for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a central integrated circuit (IC) with pins, several resistors, and a small component labeled 'ROT-TX1021'. There are also some markings like 'GHT-066' and '1201' on the board.
Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with a grid of gold-colored pads. The board is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB has a grid of gold-colored pads, likely for a component that is not yet soldered.
