

Statement and explanations

GT819 is a product which supports BLE/WWAN/GNSS, with an authenticated WWAN module (AN758-NA (Module FCC ID: 2A8RBAN758NA, Date of Grant: 04/10/2025)).

The WWAN Module(AN758-NA) is installed in the host, which has no impact on the RF performance. Considering that the antenna is designed for the host, when the module is integrated into the host, we perform EMC tests on the host and re-test the RSE. Since the BLE function is added to the whole machine, the BLE of the whole machine is tested completely. Please refer to the corresponding laboratory test results.
