

Thank you for purchasing the SWFT Gamma Electric Hoverboard.

Please read all instructions carefully before using and retain this manual for future reference.

SAFTY INSTRUCTION

THIS MANUAL APPLIES TO THE SWFT GAMMA ELECTRIC HOVERBOARD.

- In order to avoid dangers that are caused by collisions, falls, and loss of control, please learn how to ride the SWFT Gamma safely.
- You can learn operating skills by reading this product manual or by searching for instructional videos online.
- This manual includes all instructions for operating the SWFT Gamma as well as precautions to take while riding. Users must read it carefully and follow the instructions before operating.
- Users are solely responsible for any damage or injury caused by failure to follow or understand the instructions in this manual. SWFT cannot be held liable for any damage or injury resulting from user violation of the instructions in this manual.

ATTENTION

- Use only the supplied charger with this hoverboard. Manufacturer: SHENZHEN HYTELON TECHNOLOGY CO. LTD. Model: HET-TBC-420000
- Read the user manual and warning labels before riding.
- The operating temperature range of SWFT Gamma is 32°F-104°F (0°C-40°C).
- Store the SWFT Gamma in a dry, well ventilated environment.
- Do not ride on icy or slick surfaces.
- When transporting the SWFT Gamma, be careful to avoid crashes or forcful impacts as this may damage the SWFT Gamma.

WARNING

PLEASE READ THE USER MANUAL THOROUGHLY.

Failure to follow these basic instructions and safety precautions listed in this user manual can lead to damage to your device and other property, serious bodily injury, and even death.

LOW TEMPERATURE WARNING

Low temperature can affect the lubrication of moving components inside the SWFT Gamma Electric Hoverboard and increasing internal resistance. This can cause unnecessary wear to the parts inside the device and should be avoided. In low temperatures will also significantly decrease the discharge capacity and the capacity of the battery in general.

Avoid storing or using the SWFT Gamma in temperatures below 40°F/5°C.

Doing so may increase the risk of mechanical failures of the hoverboard, which may lead to damage to your hoverboard, other property, serious bodily injury, and even death.

SAFETY INSTRUCTIONS

- Keep the SWFT Gamma away from heat sources, direct sunlight, humidity, water, and any other fluids.
- To prevent electric shock, explosion, injury to yourself or others, and damage to your SWFT Gamma do not operate the device if it has been exposed to water, moisture, or any other fluids.
- Do not use the SWFT Gamma if it has been dropped or damaged in any way.
- Repairs to electrical components of the SWFT Gamma should only be performed by the manufacturer. Improper repair voids the warranty and may place the user at serious risk.
- Do not pierce, puncture or harm the exterior surface of the product in any way.

- Keep the SWFT Gamma free from dust, lint, dirt, debris and other particles that could enter the casing and damage or wear the mechanical components.
- Do not use the SWFT Gamma for anything other than its intended use. Doing so may damage the device or lead to injury to yourself

INTRODUCTION

This manual has been developed to provide you with the information needed for the safe operation and maintenance of your SWFT Gamma Electric Hoverboard. Please read it thoroughly before riding.

- or others, property damage, bodily harm and/or death.
- This product is not a toy. Keep out of reach of children.
- Do not expose batteries, battery packs, or batteries installed to this device to excessive heat, direct sunlight, or open flame.
- Do not allow clothing, hair, feet, hands, or anything of this nature to contact moving parts, wheels, or the drivetrain while the motor is running.

- Do not operate or permit others to operate the SWFT Gamma until they understand all warnings, safety features and instructions described in this manual.
- Check with your doctor before operating the SWFT Gamma to determine if you have a medical condition that would affect your ability to use the SWFT Gamma. Do not operate the SWFT Gamma if you have a medical condition that could impair your ability to safely operate the device.

- If you suffer from neck, head, or back conditions or have had prior surgery to those areas, it is not recommended that you use the SWFT Gamma.
- Do not operate the SWFT Gamma if you have a heart condition, are pregnant, or both.

- If you have any mental or physical conditions that may make you prone to injury or impair your physical or mental ability to recognize, understand and perform all the safety instructions in this manual, as well as to be able to assume the hazards inherent in use of this device, you should not use the SWFT Gamma Electric Hoverboard.
- Do not operate the SWFT Gamma if you have a heart condition, are pregnant, or both.

INTRODUCTION

The SWFT Gamma Electric Hoverboard is a personal electronic vehicle. We have developed production processes that provides for strict testing of every hoverboard. Operating the SWFT Gamma without following the instructions and warnings in this manual may lead to damage to your hoverboard or bodily injury.

PACKAGE CONTENTS

- SWFT Gamma Electric Hoverboard
- Charging Cable
- Operation Manual

- Take your SWFT Gamma out of the box and place the folded Gamma on the floor.
- Make sure the handle is pointing up. Gently pull the wheels apart until the board is flat.
- Check the LED indicator located in the center of your device. The battery indicator light should be lit, indicating the device is powered on.

- To Power Off: 1. Hold one wheel and gently pull the handle up to start folding the board. 2. Once lifted, push the wheels together.

- This model also has a self-balance function. Generally, the SWFT Gamma will activate the self-balance function when the a not activate the self-balance function, please press the power button twice while the hoverboard is on.

- There are four sensors under the foot mats on your SWFT Gamma. When riding the hoverboard, you must ensure you are stepping on the foot mats. Do not step or stand on any other area of your hoverboard.

- The SWFT Gamma may vibrate or spin in one direction if weight and pressure are applied to only one foot mat.

- Once attached to the board, the charging indicator light on the charger should change to RED, indicating that your device is now being charged.

- When the RED indicator light on the charger turns to GREEN, then your device is fully charged.

- A full charge may take up to 5 hours. While charging, you will see a yellow flashing light on the scooter, which also indicates charging. Do not charge for more than 6 hours.

- After fully charging your SWFT Gamma, unplug the charger from your device and from the power outlet.

- Do not attempt to modify, change, or replace your battery.

- Do not use your SWFT Gamma if the battery begins to emit odor, overheats, or begins to leak.

- Do not touch any leaking materials or breathe fumes emitted.

- Do not allow children and animals to touch the battery.

- The battery contains dangerous substances, do not open the battery, or insert anything into the battery.

- Do not attempt to charge the device if the battery has discharged or emits any substances. If the battery has discharged or emitted any substances, there is a risk of fire or explosion. Immediately distance yourself from the battery!

- Lithium-ion batteries are hazardous materials. Please follow all local, state and federal laws regarding recycling, handling and disposal of lithium-ion batteries.

- When charging the SWFT Gamma, please use the enclosed 3-pin charging cable or otherwise ensure that the battery charging conditions are met.

- Do not connect or attach the SWFT Gamma or the battery to a

- no further than 3 feet apart during pairing.

- Ensure Bluetooth® is enabled on your phone or music device. Refer to manufacturer's instructions for how to enable Bluetooth® on your device.

- Once you have activated Bluetooth® on your device, select the option "SWFT-GMA" from the list of available Bluetooth® devices.

- If required, enter the PIN code 000000 and confirm the entry.

- The electric scooter will say "Paired" when successfully paired.

- Please note, pairing mode on the hoverboard will last for two minutes. If no devices are paired after two minutes, the hoverboard speaker will automatically return to standby mode.

- If pairing is unsuccessful, turn off the hoverboard first and re-pair following steps 1 - 7 to reconnect.

- If your smart phone is out of range, or the battery is low on your SWFT Gamma, your speaker may disconnect from your smart device, and the hoverboard will say "Disconnected". Ensure that your hoverboard is recharged and that your smartphone is in range then follow steps 1 - 7 to reconnect.

- If there is an error in the system during operation, the running LED light will turn red (for details on system errors see SAFETY ALERTS).

- When the battery level has depleted below protection mode, the device engine will power off and stop after 15 seconds.

- If sustaining a high discharge current (such as when driving up a steep slope for a long period of time), the device engine will power off and stop after 15 seconds.

- Overheating, or motor temperature is too high.

- The device has been rocking back and forth for more than 30 seconds.

- If the system enters protection mode, the alarm indicator will light up and the board will vibrate. This typically occurs when the battery is about to run out of power and stop abruptly.

- If the platform is tilted forward or backward more than 12°, your SWFT Gamma will power off and stop suddenly, potentially causing the rider to lose balance or fall off.

- If one or both tires are blocked, the device will stop after 2 seconds.

- When the battery level has depleted below protection mode, the device engine will power off and stop after 15 seconds.

- If sustaining a high discharge current (such as when driving up a steep slope for a long period of time), the device engine will power off and stop after 15 seconds.

- Overheating, or motor temperature is too high.

- The device has been rocking back and forth for more than 30 seconds.

- If the system enters protection mode, the alarm indicator will light up and the board will vibrate. This typically occurs when the battery is about to run out of power and stop abruptly.

- If the platform is tilted forward or backward more than 12°, your SWFT Gamma will power off and stop suddenly, potentially causing the rider to lose balance or fall off.

- If one or both tires are blocked, the device will stop after 2 seconds.

PRINCIPALS OF OPERATION

The SWFT Gamma uses digital electronic gyroscopes and acceleration sensors to control balance and motion, depending on the user's center of gravity. The device also uses a digital control system to drive motors that are located within the wheels.

This device has a built-in inertia dynamic stabilization system that can help assist with balance while moving forward and backward, but not while turning.

TIP: To increase your stability, shift your weight to overcome the centrifugal force during turns, especially when entering a turn at higher speeds.

Model: SWFT Gamma (SWFT-GMA)

Net Weight: 25.8 lbs. (11.7 kg)

Load: 44-265 lbs. (20-120 kg)

Max Speed: Up to 9 mph (14.4 km/h)

Max Distance Range: 7 miles (11.3 km)

Max Incline Angle: 12°

Minimum Turning Radius: 17°

Battery Type: Lithium-Ion

Battery Voltage: 36 V

Battery Capacity: 4.0 Ah

Motor Power: 250W/2

Wheel Size: 10 inches (25.4 cm)

Product Size (mm): 160x160x120 (6.3x6.3x4.7)
