

FRONT

2-IN-1
RECORD PLAYER

AND WIRELESS PORTABLE SPEAKER

MODEL: 2IHSK1033

Product Specifications

Bluetooth Version: V5.4
Speaker Power: Max. 3W*2
Frequency Response: 20HZ-20KZ
Transmission Distance: ≥ 10 meters
Charging Voltage: DC 5V 1A
Dimensions: 320*272*130MM
Weight: 1760g

Button Functions & Interfaces

1. Dust cover
2. Adapter -Use this when playing 45 RPM records
3. Tone arm
4. Tone arm lift
5. Auto Stop ON/OFF switch
6. Speed selection (Three speeds for choice: 33.3,45 and 78 RPM.)
7. Cartridge
8. Stylus
9. Speaker
10. Power switch / Volume control
11. Aux in
12. Line Out R channel
13. Line Out L channel
14. DC power jack

Power Connection
Ensure that your home mains voltage matches the operating voltage of the unit. Connect the unit using a 5V DC adapter.

Connecting to an External Audio System
While you can listen to the turntable using the built-in speakers, you may also connect it to an external audio system. Use an RCA cable (not supplied) to connect the audio plugs to the Line Input on your mixer or amplifier. Plug the red connector into the Right (R) channel input and the white connector into the Left (L) channel input.

Playing a Record
Place your chosen record on the turntable. Select the desired playback speed (33.3, 45, or 78 RPM) using the speed selection switch. Turn on the Rotary Power Switch, keeping in mind that this dial also controls the volume. Release the tone arm lock. Carefully raise the tone arm. Position the stylus vertically over the first track of the record; the turntable will begin to spin automatically. Slowly lower the tone arm onto the record to begin playback. When the record finishes, the turntable will stop automatically if the Auto-Stop switch is in the ON position. If the switch is OFF, the record will continue spinning until you manually return the tone arm to its rest. Lift the tone arm and place it back

Connecting a Bluetooth Device
When the turntable is powered on and the tone arm is in its rest position, Bluetooth mode activates automatically. To use your Bluetooth device with the turntable for the first time, you must pair them. Activate Bluetooth on your compatible device and search for available devices. Select the speaker named "iHome Record Player" from the list. If your device prompts you for a passkey, enter "0000" and press OK. Note: The Bluetooth operating frequency range is 2.402GHz to 2.480GHz.

General Care Notes
Clean your records with an anti-static cloth to ensure maximum audio quality and prolong their life. The stylus should be replaced periodically, roughly every 250 hours of use. Occasionally dust the stylus using a very soft brush lightly dipped in alcohol, brushing from the back to the front of the cartridge.

Transporting the Record Player
Always replace the protective cap on the stylus before moving the unit. Ensure the rest clip is securing the pick-up arm.

Safety Precautions

This product is not a toy.
Keep it out of reach of children and pets to prevent hazards such as chewing or swallowing.
The recommended operating and storage temperature is between 0°C and 40°C.
Temperatures outside of this range may negatively affect the device's functionality.
Never open the product.
Touching the internal electronics can cause an electric shock.
Repairs or servicing should only be performed by qualified personnel.
Do not expose the device to heat, water, moisture, or direct sunlight.
Protect your hearing by avoiding excessively loud volumes, which can cause permanent hearing loss.
Bluetooth wireless technology operates within a range of approximately 10 meters (30 feet).
The maximum communication distance may vary based on environmental obstacles (such as people, metal objects, or walls) and the surrounding electromagnetic environment.
Microwaves emitted by Bluetooth devices may interfere with the operation of electronic medical devices.
The unit is not waterproof. If water or foreign objects enter the device, stop using it immediately to prevent the risk of fire or electric shock.
The direct plug-in power adapter serves as the disconnect device and must remain readily operable.
Ensure there is adequate space around the power outlet for easy access.
Do not use non-original accessories with this product, as doing so may cause abnormal functionality

FCC Warning
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
●Reorient or relocate the receiving antenna.
●Increase the separation between the equipment and receiver.
●Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
●Consult the dealer or an experienced radio/TV technician for help.
Warning: Changes or modifications made to this device not expressly approved by may void the FCC authorization to operate this device.
Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment.
Such modifications could void the user's authority to operate the equipment.

RF exposure statement:
The transmitter must not be colocated or operated in conjunction with any other antenna or transmitter. This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a Minimum distance of 20cm between the radiator and any part of your body.
