

Smart Eyeshade

01 Download App

Scan the QR code or search "Innerpeace" in the app store to download the application.

02 Add Luuna

Register and press Me - Add Device. Then follow the instructions to add Luuna.

03 Connect Luuna

After adding it, open the app before you use it. Luuna will be automatically connected to the phone if it's nearby and the indicator light turns blue.

04 Wear

Put on Luuna and make sure forehead sensors are in good contact with your skin.

05 Charging

The indicator will turn red and blink slowly if the battery is low. Detach the control box and charge it with the cable. When the battery is full, the indicator light will be green.

06 Storage

After you close the app, Luuna will sleep automatically. No need to shut it down. Do not fold the device when it is stored

FCC warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
