Subject: Confidentiality Request for FCC ID: 2APRL-STFS001

To Whom It May Concern,

WilliamsRDM, Inc. ("WRDM") has spent substantial time, effort and expense in developing the 2APRL-STFS001 product (the "Product"). The Product is one of the first of its kind in the industry. The information provided along with this letter related to the Product constitutes trade secrets of WRDM. The information is not readily available to the public and has only been disclosed to third parties pursuant to confidentiality agreements which restrict public disclosure. Having the subject information easily available to WRDM's competition would negate the commercial benefits and advantages WRDM has worked hard to achieve by developing the Product. Disclosure of these trade secrets would provide WRDM's competitors with an unfair advantage and would likely result in financial harm to WRDM. WRDM has taken security measures internally to prevent unauthorized disclosure of the subject information, including an electronic document control repository for securing confidential documents with limited access by employees. We respectfully request that under the provisions of 47 CFR 0.459 and 0.457(d) the documents listed below and attached with this application for certification be provided with permanent confidentiality status:

- Schematics
- Operational Description
- Frequency Block Diagrams

WRDM also respectfully requests that any exhibit / information for which we have requested permanent confidentiality, but which may not be accorded such treatment by the FCC be returned to WRDM.

Sincerely,

Christopher M. Stimek
R&D Manager
WilliamsRDM Inc.
