Therefore, the following table depicts
 the characteristics and distribution of
 the response to the
 Table 1: Distribution of responses

The first step in the learning process is to **analyze** the data. This involves identifying the variables and their relationships. Once the data is analyzed, the next step is to **synthesize** the information. This involves combining the data into a coherent whole. The final step is to **evaluate** the results. This involves comparing the results to the original goals and objectives.

10. (11 marks) **Proof of the existence of a solution** to the problem (1)–(3) is established in the following theorem.
