

10W Wireless Charger

Package Contents

- Wireless Charger - 1
- QC18W Adapter - 1
- Instruction Manual - 1

Wireless Product Specification

- Input: 5V $\equiv$ 3A, 9V $\equiv$ 2A, 12V $\equiv$ 1.5A
- Output: 10W(Max)

Compatibility

This wireless charger could provide power supply for devices with built-in wireless charging receiver.
(Applicable to wireless charging devices that support the Qi1.3 module)

10W Wireless Charger Using Instructions

1 Insert cable USB-A into the QC18W adapter and then plug the adapter into the power outlet. USB-A cable made of PVC 3ft /0.915m.

2 The LED indicator lights up to indicate well connectivity.

3 Place your phone on the wireless charger. Make sure that the phone is well located at the charging area of wireless charger. When the phone is being charged, the LED indicator will light up automatically to show charging status.

Do not place any foreign objects between your device and the wireless charger's surface, including metal pads on a car mount, magnetic cards, door keys, coins, NFC cards or other metal objects, as they could potentially demagnetize the wireless charger, affect the charging speed, or cause overheating.

FCC compliance statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
- Changes or modifications not expressly approved by the party responsible for compliance could void the users authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
