Features

Frequency: 110 kHz–148 kHz (only for EU/UK)
 -24.12 dBuA/m (@10m) & 360 kHz (only for EU/UK)
 -23.58 dBuA/m (@10m)
 H-Field: 1.6 dBuA/m @ 3m / 5.6 dBuA/m @ 3m
 Input: 5V=3A, 9V=3A, 12V=2.5A, 15V=2A
 Output: 25W (Max)

Safety information

RF Warning
This equipment is part of the FCC Part 15 equipment. It is subject to the following two conditions (1) This device may not cause harmful interference, and (2) it must accept any interference received, including interference from authorized radio communications services. Any changes in modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used correctly, it may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to other electronics, the user is encouraged to try to correct the interference by one or more of the following actions:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

FCC RF Warning
This equipment complies with FCC radiation exposure limits and has been tested to meet the requirements for compliance. It should be installed and operated with minimum distance between the user and the surface of the equipment.
