TROUBLESHOOTING GUIDE - Push Notification What can I do if I cannot receive notifications? - Ensure the motion detection alarm is turned on. - Ensure your phone notification setting is enabled for LaView APP. - Ensure the phone has decent network bandwidth. - Ensure the camera is online. - Night Vision The camera is equipped with infrared LED technology to capture black and white night vision image in detail at night. However, the night vision image quality may be affected by the following factor: - There are high contrast light sources such as car headlights pointing to the camera. - The camera is facing reflective surfaces, such as windows and mirrors. Daytime Night - Battery What can I do if the battery of the battery drains too fast? The battery life of the camera varies based on actual using environment and scenario. It would mainly relate to the recording frequency and the length of each recording clip. Check the chart and the following example for reference. <table> <thead> <tr> <th>Maximum Recording Time</th> <th>Recording Frequency</th> <th>Length of Each Recording Clip</th> </tr> </thead> <tbody> <tr> <td>Up to 180 days</td> <td>10 clips</td> <td>10 seconds per clip</td> </tr> <tr> <td>Up to 90 days</td> <td>20 clips</td> <td>10 seconds per clip</td> </tr> <tr> <td>Up to 30 days</td> <td>20 clips</td> <td>30 seconds per clip</td> </tr> </tbody> </table>	Maximum Recording Time	Recording Frequency	Length of Each Recording Clip	Up to 180 days	10 clips	10 seconds per clip	Up to 90 days	20 clips	10 seconds per clip	Up to 30 days	20 clips	30 seconds per clip	FCC COMPLIANCE - Cold temperatures affect battery's capacity because of their chemistry. If you install the camera outside in cold temperatures, you might notice a shorter battery duration for the camera, or a faster than expected drop in the displayed battery capacity. - If the camera is placed at a location with high traffic, we recommend relocating it to a place with less traffic to receive less alerts and extend battery life. - Try positioning the camera closer to the M2 Base Station as it uses more battery power if it is positioned farther away from the M2 Base Station. - Night Vision The camera is equipped with infrared LED technology to capture black and white night vision image in detail at night. However, the night vision image quality may be affected by the following factor: - There are high contrast light sources such as car headlights pointing to the camera. - The camera is facing reflective surfaces, such as windows and mirrors. Daytime Night - Waterproof and Outdoor Use The camera is IP66 rated for totally dust tight and protection against low-pressure jets of directed water from any angle. The camera can operate between -4°F ~122°F (-20°C~50°C) for all weather use. We recommend placing the camera under the eave and avoid heavy rain or snow to maximize camera life span. TIPS For more technical questions or tutorials such as Cloud Storage setting, please follow in-APP tutorial section in the LaView APP or visit our Youtube tutorials.	CUSTOMER SERVICE We proudly offer manufacture 1-year warranty on all LaView products. If you wish to return a product within the return period, please message us directly in your Amazon account or on our website. LIVE CHAT: In LaView APP or on laviewusa.com Email: info@laviewusa.com Our professional technicians are committed to reply all your requests within 24 hours If you purchased from Amazon, you can also contact our professional customer service team in your Amazon account	WARRANTY CARD Your LaView product is protected by a 1-year warranty from the purchase date. For more information on repairs, exchange, and other policies, please visit: www.laviewusa.com Please send all inquiries through the Contact Form on our website, or email us at info@laviewusa.com. And our technicians would be glad to assist you.	WARRANTY CARD Your LaView product is protected by a 1-year warranty from the purchase date.
