

MODULAR APPROVAL ATTESTATION LETTER
(pursuant to FCC Rule §15.212)

FCC ID: 2AQ2Q-HALOW1
Model: HALOW1
Applicant: Cargt, Inc.
Address:
9825 Widmer Rd
Lenexa, Kansas 66215
FCC Rule Part: 15

Cargt, Inc. hereby submits this Modular Approval Attestation in accordance with 47 CFR §15.212 for the above-referenced transmitter module.

The modular transmitter has been evaluated and complies with the applicable requirements for modular approval as detailed below:

(i) RF Shielding

The modular transmitter incorporates RF shielding over the radio elements to prevent emissions from exceeding FCC limits when installed into a host device. Any external components such as the crystal or tuning capacitors are permitted outside the shielded section in accordance with §15.212(a)(1).

(ii) Buffered Modulation / Data Inputs

The modular transmitter includes buffered modulation and data inputs to ensure compliance with Part 15 requirements under conditions of excessive data rates or over-modulation.

(iii) Power Supply Regulation

The modular transmitter incorporates on-board power supply regulation to ensure continued compliance with FCC requirements regardless of host power supply variations.

(iv) Antenna and Transmission System Requirements

The modular transmitter complies with the antenna and transmission system requirements of §§15.203, 15.204(b), and 15.204(c). The module does not include a permanent antenna connector. The antenna interface is implemented on the host device and must comply with the antenna types, connector types, and maximum antenna gain specified in the module integration instructions. The module is approved for use only with the antennas listed in this filing.

(v) Stand-Alone Testing

The modular transmitter was tested in a stand-alone configuration for compliance with Part 15 requirements. Testing using an evaluation board is acceptable. When applicable, the module complies with the AC line conducted requirements specified in §15.207.

(vi) Labeling

The modular transmitter is labeled with its own FCC Identification Number. Instructions are provided for proper labeling of the host device, including the requirement to display "Contains FCC ID: 2AQ2Q-HALOW1" when the FCC ID is not visible after installation.

(vii) Compliance Instructions

The modular transmitter complies with all applicable FCC rules and operating requirements that ordinarily apply to a complete transmitter. Adequate installation and operating instructions are provided to OEM integrators to ensure continued compliance.

(viii) RF Exposure

The modular transmitter complies with applicable FCC RF exposure requirements under the specified installation and operating conditions.

Modular Approval Declaration

The transmitter module described above meets all applicable requirements of 47 CFR §15.212(a) and is eligible for **Full Modular Approval**.

Attestation:

I attest that the statements made in this document are true and correct to the best of my knowledge. I further attest that the above-referenced device complies with all applicable FCC rules and requirements.

Signed:
