

HM-5C Omni-directional microphone speaker

User's manual

Please read this manual carefully before use (Ver. 1.4)

Product description

This device is a conference speakerphone (omnidirectional microphone) with USB wired and Bluetooth wireless connections. Integrating sound pickup and playback, it delivers high-definition audio. Featuring advanced intelligent voice processing, it supports 360° omnidirectional sound pickup, echo cancellation, intelligent noise reduction and full-duplex calling. Built-in voice announcements notify Bluetooth and USB connection status for easy monitoring. Its internal battery enables portability. Compatible with smartphones, laptops, desktops, tablets and conference large-screen displays.

Note: Figures in this manual are schematic diagrams only. The actual product shall govern.

Device connection

1. Power On/Off and Charging for the host device

Press and hold the power-on/off button, the host will voice prompt power-on, and all work indicator lights glow green. Press and hold this button again to power off, and the work indicator lights turn off. When powered off, the host will automatically power on if its USB cable is plugged into a computer device for use.

When the host device voice prompts "Low power, please charge", and the working indicator flashes orange three times every 10 minutes, connect the USB cable for charging promptly. Charge when powered off, the Bluetooth indicator glows red and turns off once fully charged.

2. Wireless connection between the host and the computer Bluetooth device

When the host is turned on, the blue light of the Bluetooth light flashes continuously and waits for connection. At this time, the computer device is set to Bluetooth search. Select the model of the machine to pair. When the connection is successful, the blue light of the Bluetooth light of the host turns to be normally on. Press and hold the host Bluetooth button to disconnect the wireless connection of the current Bluetooth device. At this time, the blue light of the host Bluetooth light turns to flash.

3. USB wired connection between the host and the computer device

In the shutdown state, when the host and the computer device are plugged into the USB interface data cable, the host device will be automatically turned on, the green light of the working light will be on, and the voice will prompt the connection of the USB speaker. After the automatic installation is successful, the screen of the computer device will prompt that it is ready or the device can be used, indicating that the USB cable has been successfully connected.

Instructions

Connect the equipment according to the application scenario, use the instant messaging or online conferencing application software in the computer device, and follow the operating methods of the application software to make online conference calls.

1. Increase the speaker volume

Press the volume up button and the speaker volume will gradually increase. When the volume is adjusted to the maximum, the green light of the working light will flash three times in succession.

2. Reduce and mute the speaker volume

Press the volume down button to gradually reduce the speaker volume. When the volume is adjusted to the minimum and the speaker is muted, the green light of the work light will flash three times quickly and then flash slowly.

3. Microphone mute

Press the microphone mute button to mute the microphone. At this time, the working indicator light changes from green to red. Press the button again to unmute the microphone, and the indicator light will switch from red back to green.

Precautions

- In order not to affect the use of the device, please do not block the host microphone, or place the device in a location with obstructions around it.
- During use, if necessary, you can adjust the volume through the speaker options on the computer. When using instant messaging or Internet phone application software, please select this model of host device as the preferred audio device.
- If any liquid accidentally enters the product, please disconnect it immediately and remove the product.
- Do not place this product near a heat source or directly exposed to a fire source.
- Please do not place this product in an environment with strong electromagnetic force, otherwise it may cause product failure.
- Do not attempt to repair this equipment, as there is a risk of electric shock. If there is a problem and requires repair, please contact your seller.

Name and content of harmful substances in the product

Component Name	Hazardous substance					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent chromium (Cr (VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
Wire and cable	○	○	○	○	○	○
Plastic shell	○	○	○	○	○	○
Circuit board assembly	×	○	○	○	○	○
Horn	○	○	○	○	○	○
Other attachments	○	○	○	○	○	○

This table is prepared in accordance with the provisions of SJ/T11364.

O: The content of the hazardous substance in all homogeneous materials of the component is below the limit requirements specified in GB/T26572.

x: Indicates that the content of the hazardous substance in at least one homogeneous material of the component exceeds the limit requirements specified in GB/T26572.

Note:

- Circuit board components: including printed circuit boards and their parts, components, solder joints, etc;
- Depending on the product model, the product you purchased may not contain all of the above components;
- The environmental protection period of this product is 10 years, and some detachable components may have different environmental protection periods. These environmental protection periods are stick it separately on the corresponding component;
- The environmental protection period of the product/component only applies to the use of the product under the conditions specified in the product description.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
