FCC Laboratory
7435 Oakland Mills Rd
Columbia MD 21046

SUBJECT: Class II Permissive Change for FCC ID: 2AQ68W696P, Model: T99W696

The 5G WWAN Module has been granted by FCC dated 02/04/2026 under FCC ID: 2AQ68W696P. The intention of this application is to enable the modular certified FCC ID: 2AQ68W696P to be integrated in Lenovo Notebook Computer TP00158C. The LTE B42, 42C, LTE B43, n77, and n78 operation under rule part 96 will be disabled via embedded software when the module integrated in the above-mentioned host.

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: 2AQ68W696P was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna with lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.

A handwritten signature in black ink, appearing to read 'Nancy' followed by a stylized flourish, is written over a horizontal line.
