Troubleshooting about the camera with APP

PROBLEM	CORRECTIVE ACTION
Camera will not connect to my Wi-Fi network	• Make sure the Wi-Fi signal is flashing. If the Wi-Fi signal is not flashing, you will need to press and hold Reset Button (see the Description section). • Make sure the Wi-Fi network is a 2.4GHz network, device will not connect to a 5GHz network. • Test your Wi-Fi network work with other devices such as your phone or computer to make sure it is operation properly. • The Wi-Fi connection may be out of range during pairing. Use your phone to check range, it is recommended to have at least 2 signal bars showing for proper connection. • Your Wi-Fi network password is case sensitive, make sure you are entering it correctly.
The camera is off-line	• There could be a temporary issue with your internet connection (e.g., service disruption). Please try again in a few minutes. • Make sure your Wi-Fi router is turned On. • The camera may not have power to it, make sure the wall switch and breaker is in the On position. • Make sure the camera is getting a good signal from your Wi-Fi router. Use your phone to check range, it is recommended to have at least 2 signal bars showing for proper connection. • The camera may have been disconnected from your Wi-Fi network, press and hold Reset Button(see the Description section) until you hear an audible tone.
Live video stream is slow to load	• Camera streaming issues may be caused by any of the following: • Your phone's cellular connection, which relies on mobile coverage. • Limited internet bandwidth at home, for example, other video streaming services running at the same time on your network can cause congestion slowing down the internet upload and download speeds. • Wi-Fi reception may not be stable or work reliably if the camera's Wi-Fi signal strength is less than 2 signal bars. You may need to install a Wi-Fi repeater or extender to boost the Wi-Fi signal.
How to reset the camera to reenter pairing mode?	• Press and hold reset button located at the back of the camera (see Description section) until you hear an audible tone.

The camera is not recording?	• Make sure Record Switch is turned On in APP, under SD Card Settings. This is located in Settings menu on the upper right corner in the control panel. • Make sure that the microSD card is installed correctly. To confirm the camera is recognizing the microSD card, go to the SD card Settings in the Settings menu and make sure microSD Card capacity shows Total capacity, Used and Free space. If this does not appear you may consider reformatting the microSD card. • WARNING: Reformatting microSD card will delete all videos stored on card. Please go through the troubleshooting section before doing so.
How do I set the camera to Event or Continuous Recording?	• In the Settings menu under SD card settings make sure Record Switch is Turned ON and then select Event Recording or Continuous Recording.
How do I check the available space on the SD card?	• In the Settings menu under SD settings, you will see Used Space and Free Space. • Note: Camera only support 128GB or less microSD cards with FAT32 format.
What happens when the microSD card reaches full capacity?	• On the microSD card reaches full capacity, new videos will start rewriting(deleting) over the oldest videos.
Can I use a new microSD card if I do not want to record over existing videos?	• Yes, you can use a new microSD card if you do not want to record over existing videos by removing the side cover on the camera and replacing the exiting microSD card with a new one as long as it does not exceed 128GB. Once this is completed you will need to format the microSD card by going to the SD card settings in the Settings menu and pressing Format SD Card then Confirm. • WARNING: Reformatting microSD card will delete all content stored on card.
Why can't I receive alarm messages on my phone?	• Make sure that the notification push permission of the APP in the smartphone settings is • turned on. Then open the message notification in the notification settings of the APP, and the current time is not in the planned time period for stopping the notification. • Normally, it will appear in the smartphone notification bar when an event is detected. Messages.
Why the camera can't be operated by a shared account?	• For security reasons, the permissions of the shared account are restricted, and the device cannot be operated. If others want to operate the camera, they can log in directly with the bound account and password.

What should I do if I need to change a Wi-Fi to connect the camera?

- There are two methods:
- The camera does not change the place and can search for the new Wi-Fi, in the parameter setting menu >> change the Wi-Fi connected to the device >> change the corresponding Wi-Fi;
- The camera has changed the place and can't find the new Wi-Fi, reset the camera to factory settings, and reconfigure the network.
