6.Type-C charging port

Functional description

Product Description

Bluetooth version: 5.3
Working temperature: -10°C ~ 40°C
Battery capacity: 65mAh
Charging period: about 90 minutes
Total musical playtime: about 4hours (in moderate volume)
Chip type: JLR8501
Audio decoding: AAC, SBC
Lowspeaker type: 15.11 (MM) full-range compound titanium speaker

Frequency response: 20Hz~20KHz
Standby time: 20 days
Connection distance: 12m

Applicable devices: Bluetooth devices that support HFP/HSP/AVRCP/ATP protocols, such as mobile phones and computers, to make calls and listen to music

Mobile charging box

Battery capacity of the charging box: 400mAh
Charging time: 1.5h
Input current: 5V/0.5A
Output current: 5V/0.5mA (single)
Charging cycles: about 2.5 ~ 3

Details of Functions

Power on

This headset will be on automatically after opening the cover of the charging box / to manually power it on, please long press "Power" 3 seconds, with the blue indicator always on for 1S and a prompt tone "Power", then, the headset will enter automatic connection. If there is a device that has been paired and connected with it nearby, it will be automatically connected back. If there is no such device, the master earpiece will enter

Pairing with device

To pair with a device, please power on your mobile phone and enable "Bluetooth", refresh the device list to find out "D39" and then click it for pairing. After successful connection, the headset will prompt "Connected", with the blue indicator on both earpieces flashing every 5 seconds and the prompt that "the headset is already connected" displayed on your mobile phone.

Factory reset

For factory reset in case of manual change of pairing settings (the pairing has been completed in factory by default), please make 6 consecutive clicks to restore the headset to its factory settings. Bluetooth or not, then, the red and blue indicators begin to flash quickly (in pink), then, connect to the device you want as instructed above.

Power off

The headset will be off and charged automatically after it is put into the charging box with its cover closed / to power it off when it

is on, please long press "Power" 5 seconds to manually power it off (both the earpieces will be off synchronously with manual power-off); then, the red indicator will be on for 1S, with a prompt "Power Off".

Cautions

In case of any need to use one of the earpieces, just put the other one into the charging box, and the earpiece you want to use will be switched to automatically, and act as the master one in subsequent use. You definitely need to use both earpieces, just put the other one and make it connected automatically.

General features

Play/pause: when the music is playing, please double click the headset power button, with the blue indicator on both earpieces flashing every 5 seconds.

Next: when the music is playing, please gently touch the right earpiece 1 times, with the blue indicator on both earpieces flashing every 5 seconds.

Previous: when the music is playing, please gently touch the left earpiece 1 times, with the blue indicator on both earpieces flashing every 5 seconds.

Answer a call: when there is an incoming call, please touch once the headset earpieces operable, with the blue indicator on both earpieces flashing every 5 seconds.

Factory reset

For factory reset in case of manual change of pairing settings (the pairing has been completed in factory by default), please make 6 consecutive clicks to restore the headset to its factory settings. Bluetooth or not, then, the red and blue indicators begin to flash quickly (in pink), then, connect to the device you want as instructed above.

Power off

The headset will be off and charged automatically after it is put into the charging box with its cover closed / to power it off when it

Disconnect device: disable "Bluetooth" on your mobile phone so that the master earpiece enters the pairing mode, with the red and blue indicators on for 1S, with a prompt "Bluetooth Disconnected". Automatic connection: after the charging box is opened, it will be connected automatically to the last device connected previously. If the device is not in the range of connection, the master earpiece, confirmed that can enjoy return, replacement or repair service, will enter the pairing mode in 8 seconds automatically. Low battery prompt: it will beep for low battery when the voltage is below 3.3V. Automatic shutdown: it will be off automatically if no device is connected in 5 minutes or the battery voltage is below 3.2V.

Status of indicators on the headset

Power on: the headset will be on after the blue LED indicator stays on for 1 seconds.

Power off: the headset will be off after the red LED indicator stays on for 1 seconds with a prompt tone.

Pairing: the red and blue LED indicators on both earpieces flash alternately.

Pairing for connection with a device: the red and blue LED indicators on the master earpiece flash alternately.

Standby state after successful connection with a device: after successful connection, the L/R blue indicator flashes every 5 seconds.

On a call: the L/R blue indicator flashes every 5 seconds.

Status of indicators on the charging box

1. During charging: after inserting the USB charging cable to power on, the 4 indicators turn on and turn around, with the current battery level displayed for 3 seconds. When the battery level is 50%, the power on the headset, and make it enter the pairing mode (with the red and blue indicators on the master earpiece flashing alternately) and close to the mobile phone to be connected for consecutive 2 seconds (both earpieces operable), with a prompt tone "BT".

Enable Siri: long press 2 seconds (both earpieces operable) when the headset is connected with your mobile phone to enable Siri; to disable Siri, long press 3 seconds again.

2 flashing slowly and the indicator 1 always on; when the battery level is within 50%-75%, both the indicators 1 and 2 will be always on, with the indicator 3 flashing 1 times every 5 seconds; when the battery level is within 75%-100%, all the three indicators will be always on, except the indicator 4 flashing slowly; when the battery level reaches 100%, all the indicators, confirmed that can enjoy return, replacement or repair service, will be always on.

2. During charging the headset (without any external charge) after closing the cover of the charging box, the current battery level will be displayed for 5 seconds, and then it begins to charge the L/R earpieces. Indicators on the left and the far right indicate the states of the L/R earpieces respectively. Both the indicators will be always on during charging, and turn off after 1 minute charged.

3. Fully charge the charging box (with a cable): the white indicator 1 will be always on.

4. Current battery level: the current battery level of the charging box will be displayed for 5 seconds after its cover is opened.

5. Low battery: the indicator will flash quickly after the battery bar turning on (every 0.5S), and the headset will keep alarming before it enters the low voltage protection mode.

Steps of Operation

Please fully charge the headset before each use, and make sure the battery of the device or mobile phone to be used with the headset is also in a high level.

Then, power on the headset, and make it enter the pairing mode (with the red and blue indicators on the master earpiece flashing alternately) and close to the mobile phone to be connected for consecutive 2 seconds (both earpieces operable), with a prompt tone "BT".

Power on your mobile phone and enable "BT", then, click the search button to search for the device and click it for connection. After successful connection in several seconds, the blue indicator

on both earpieces will flash every 5 seconds, and your mobile phone will display that the device has been connected.

Then, you can enjoy the right to repair, replace and return goods according to this regulation.

1. Within 7 days from the day after you sign for the product, the product performance failure, after-sales service center testing confirmed that can enjoy return, replacement or repair service; 2. Within 15 days from the day after you sign for it, if the product has a performance failure, After-sales service center testing confirmed that can enjoy replacement or repair service; 3. In case of performance failure of this product within 12 months from the day after you sign for it: After-sales service center testing confirmed that can enjoy repair service.

If there is a demand for after-sales service, please contact customer service.
