

The Orange Pi 800 looks like a keyboard in appearance, but there is a motherboard inside. Just connect a monitor and mouse with USB interface, and the Orange Pi 800 can become a complete and usable ARM64 computer. Orange Pi 800 uses Rockchip RK3399 (28nm HKMG process) system level SoC, and equipped with 4GB LPDDR4 memory, 64GB eMMC and a variety of peripheral expansion interfaces. Orange Pi 800 can run Android12.1, OrangePi OS, Manjaro, Ubuntu22.04, Debian11 and other operating systems.

Diagram illustrating the bottom of the HP Elite 840 G4, showing various ports and components labeled 1 through 10:

1. MicroSD card slot
2. Kensington lock slot
3. Headset jack
4. USB Type-C port
5. USB Type-A port
6. Ethernet port
7. Audio jack
8. USB Type-A port
9. USB Type-A port
10. USB Type-A port

- 01

A close-up photograph of a white Apple keyboard. The keyboard features a standard QWERTY layout with white keys and black lettering. A power button, which is a square with rounded corners and a power symbol, is located in the top right corner. This button is highlighted by a hand-drawn orange circle, and a thin orange line connects it to a larger orange circle in the upper right corner of the image. The keyboard is shown from a slightly elevated angle, and the background is a plain, light-colored surface.

CPU	Rockchip RK3399(64 bit ARM® Dual Core CortexA72 1.8GHz+Quad Core CortexA53 1.4GHz)
GPU	ARM Mali-T860MP4
Memory (SDRAM)	4GB LPDDR4 (shared with GPU)
Onboard Storage	MicroSD card, 64GB eMMC Flash
Onboard Network	YT8531C, 10M/100M/1000M Ethernet RJ45
Onboard WiFi+BT	On-board module (CDW-20U5622) 2.4GHz/5GHz Dual band WiFi, supporting IEEE 802.11a/b/g/n/ac protocol Bluetooth 5.0, supporting BLE
Video Outputs	HDMI 2.0 VGA
Audio Output	HDMI output Analog audio Onboard speaker
Audio Input	Microphone On-board analog audio input
Keyboard	78 keys QWERTY keyboard

- | Position | Colour | Effect | Explain |
|-------------------------|--------|-------------------------|---|
| Leftmost LED | Red | Power indicator | It will always be on after the system is started |
| LED light in the middle | Green | Caps lock key indicator | After the system is started, the two LED lights will go out, and then the LED lights will turn on or off according to the pressing of Caps Lock key and NumLk key |
| Rightmost LED | Green | NumLk key indicator | |

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
